

**Our sustainability goals by the year 2020:**

- Zero carbon footprint
- Zero landfill
- Zero hazardous waste generation
- Zero air emissions (VOCs)
- Zero process water use
- 100 percent green electrical energy use
- Company buildings constructed to a minimum LEED Silver certification
- 100 percent of sales from DfE approved products

**Environmental Product Summary**  
**Equa 2® Chair**

**Design Story: Ergonomic Comfort that’s Environmentally Responsible**

Bill Stumpf and Don Chadwick designed the Equa 2 with the belief that everyone, regardless of their size, shape, or organizational status, deserves a good, ergonomically supportive chair. The result is high-performance seating suitable for the range of activities one experiences in a typical workday.

Throughout Equa 2’s design and development stages, we emphasized environmental responsibility in raw material selection and sourcing. Preference was given to materials from renewable and sustainable sources.

**Herman Miller’s Design Protocol**

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products, utilizing the McDonough Braungart Design Chemistry (MBDC) Cradle to Cradle<sup>SM</sup> Design Protocol.

Cradle to Cradle Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in three key areas:

- *Material Chemistry and Safety of Inputs*—What chemicals are in the materials we specify, and are they the safest available?
- *Disassembly*—Can we take products apart at the end of their useful life, to recycle their materials?
- *Recyclability*—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product’s useful life?

**level® Certification**

Equa 2 is certified **level 1**. The **level** conformance mark ensures a comprehensive, independent, and impartial

assessment of the environmental and social impacts of a product.

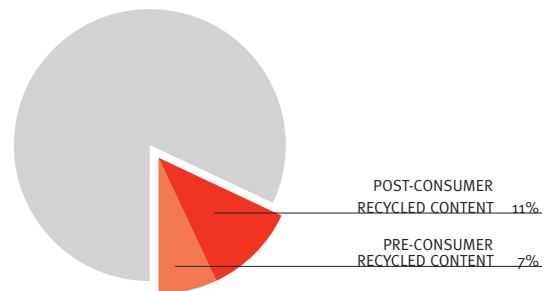

**Material Content**

The Equa 2 chair’s components are constructed from plastic, aluminum, steel, and other materials.

The Equa 2 chair is up to **86 percent recyclable** at the end of its useful life.

Equa 2 is comprised of **18-percent recycled** materials. The recycled content breaks down to 11-percent post-consumer and 7-percent pre-consumer content.

- Die-cast aluminum components are typically made from more than 95-percent recycled material and are 100 percent recyclable.

## Environmental Product Summary

# Equa 2® Chair

---

- Plastic components are identified with an ASTM recycling code whenever possible, to aid in returning these materials to the recycling stream.
- Steel components contain approximately 33 percent recycled content and are 100 percent recyclable.
- Most metal components are powder-coated, which eliminates solvents and volatile organic compounds (VOCs) from the finishing process.
- Foam and textile materials are part of an open-loop system and can be recycled into everything from automotive components to carpet padding at the end of their current life.
- Textiles used in Herman Miller products can be made from natural or synthetic fibers. Several textiles are available with 100 percent recycled content.
- *Returnable/Recyclable Packaging*—Packaging materials include corrugated cardboard and a polyethylene plastic bag. These materials are part of a closed loop recycling system, meaning they can be recycled repeatedly.
  - Whenever possible, shipments between Herman Miller and its suppliers include the use of pallets and other returnable packaging to minimize waste.
  - On large North American orders, disposable packaging can be replaced with reusable shipping blankets.

### Manufacturing Process

- *Green Energy and Emissions*—The Equa 2 chair is manufactured at Herman Miller’s GreenHouse seating operations in West Michigan using green energy.
- *ISO*—Equa 2 is manufactured in West Michigan at an ISO 14001-certified site.
- This plant also is a LEED Pioneer building.
- *Worker Health and Safety*—Herman Miller strives to meet or exceed OSHA standards.

### Product Performance

- Easy assembly for cost-efficiency and quick parts replacement.
- Easy disassembly for recyclability.
- Designed for durability, an important environmental criterion.
- Backed by Herman Miller’s 12-year, 24/7 warranty.

### Indoor Air Quality

The Equa 2 chair is GREENGUARD® certified as a low-emitting product that meets current indoor air quality standards.

### Corporate Environmental Policy

For more information on Herman Miller’s Corporate Environmental Policy and other environmental efforts, visit the “About Us – Environmental Advocacy” section of HermanMiller.com.

### Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We not only encourage our suppliers to minimize their operations’ environmental impacts, but require they assist us in decreasing our facilities’ negative environmental effects, as well.

### LEED

The Equa 2 chair may contribute to LEED credits due to its returnable/reusable packaging, durability, pre-consumer and post-consumer recycled content, and GREENGUARD certification. Depending on location, Equa 2 also may contribute to a LEED Regional Materials credit. Please refer to <http://hermanmiller.com/ecoScorecard> or contact your Herman Miller representative for detailed LEED information.

***It’s important to note that no interior furnishings, individually or collectively, can guarantee a specific number of points for LEED certification.***

Herman Miller complies with the Federal Trade Commission’s Part 260 Guides for the Use of Environmental Marketing Claims.
