# Introduction

## A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

### Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

### Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

This book is effective December 7, 2009, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit [www.HermanMiller.com](http://www.HermanMiller.com).

All prices are list prices in US Dollars. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest  $\frac{1}{8}$ ". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

### 20-Day or Less/Assigned Lead-Time Shipments

All products and options in this price book not designated by an Assigned Program icon  will ship in **20 business days or less** after being acknowledged by Herman Miller.

Products and options designated by an  are on the assigned lead-time program and may ship in 20 days, less than 20 days, or more than 20 days from order acknowledgement.

## Product Information

### Description

This desk module connects to other Passage desk modules. It has a corner work surface, stanchions, a 29"-high filler kit, end supports, back panels, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge.

The desk module is available nonpowered or powered. The powered modules have single-sided harnesses installed in the left and right electrical channels; each electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

The dimension from the center of the radius to the back corner of the work surface is 30" for the 24"-deep surface and 38 1/2" for the 30"-deep surface. The radius of the corner is 18".

### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.

For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with C-leg or recessed leg on each end.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see Cable Capacity Charts in Kiosk.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface. Freestanding pedestals used below work surface interfere with user's knee space.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

### Product Information

#### Description

This desk module connects to other Passage desk modules or stands alone. It has a left- or right-hand extension of the corner work surface, stanchions, a 29"-high filler kit, end supports, back panels, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge.

The desk module is available nonpowered or powered. The powered modules have single-sided harnesses installed in the left and right electrical channels; each electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see *Passage Planning Guide*.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see *Passage Planning Guide*.

For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with C-leg or recessed leg on each end.

For stand-alone desk module, specify 2 C-legs, 2 full end panels, or 1 C-leg and 1 full end panel.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see *Cable Capacity Charts* in *Kiosk*.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface.

Freestanding pedestals used below 42"- to 60"-wide work surfaces interfere with user's knee space; freestanding pedestals can be used below 66"- to 78"-wide work surfaces. 30"-wide lateral files can be used below 72"- and 78"-wide work surfaces; 36"-wide lateral files can be used below 78"-wide work surfaces. To order optional freestanding storage products, see *Meridian® Freestanding Storage*.

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in *Kiosk* and *HermanMiller.com*: *Keyboard Compatibility Charts*, *Pencil Drawer Compatibility Charts*, and *Work Organizer Compatibility Chart*.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

PA4LC.  
PA4LE.  
PA4VA.  
PA4VC.  
PA4VE.

### Product Information

#### Description

This desk module connects to other Passage desk modules. It has a laminate top and vinyl edge and a height-adjustment range of 26" to 31" at 1" increments. The desk module has an input platform, stanchions, a 29"-high filler kit, end supports, back panels, electrical and cable management channels, and adjustable glides. The input platform holds a keyboard, mouse, or other input device. The height is adjusted with a paddle under the right side of the platform. The pneumatic assist mechanism allows the user to freely adjust the platform from 8" below the rear work surface to 5<sup>3</sup>/<sub>4</sub>" above it. The platform also tilts 15° forward and 15° backward using a knob on the right side.

The desk module is available nonpowered or powered. The powered modules have single-sided harnesses installed in the left and right electrical channels; each electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

When height of 24"-deep work surface is set below 29", user height-adjustment mechanism interferes with access to cable management channel from user side of desk module.

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide. For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.

For adjustable-height desk module, specify module with C-leg or recessed leg on each end.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

To convert desk module supports, order support conversion kit (PL302. or PL303.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see Cable Capacity Charts in Kiosk.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface. Freestanding pedestals used below work surface interfere with user's knee space.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

PB1VA.  
PB1VC.  
PB1VE.

### Product Information

#### Description

This desk module connects to other Passage desk modules or stands alone. It has a rectangular work surface, stanchions, a 29"-high filler kit, end supports, a back panel, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge.

The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel. The electrical harness has 1 receptacle location on the 24"-wide desk module; all other desk modules have 2. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.

For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with C-leg or recessed leg on each end.

For stand-alone desk module, specify 2 C-legs, 2 full end panels, or 1 C-leg and 1 full end panel.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see Cable Capacity Charts in Kiosk.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface.

Freestanding pedestals can be used below work surface. 30"-wide lateral files can be used below 36"- to 78"-wide work surfaces; 36"-wide lateral files can be used below 42"- to 78"-wide work surfaces; 42"-wide lateral files can be used below 48"- to 78"-wide work surfaces. To order optional freestanding storage products, see Meridian® Freestanding Storage.

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

Passage® Work Surfaces

## Product Information

### Description

This desk module connects to other Passage desk modules. It has a curvilinear work surface that is 24" deep on 1 side and 30" deep on the other side, stanchions, a 29"-high filler kit, end supports, a back panel, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge. The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel; the electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.

For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with C-leg or recessed leg on each end.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see Cable Capacity Charts in Kiosk.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface.

Freestanding pedestals can be used below work surface. Lateral files can be used below 48" to 78"-wide work surfaces. To order optional freestanding storage products, see Meridian® Freestanding Storage.

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

PC2LC.  
PC2LE.  
PC2VA.  
PC2VC.  
PC2VE.

### Product Information

#### Description

This peninsula desk module connects to another desk module on the left or right side. It has a work surface with an ellipse peninsula, stanchions, a 29"-high filler kit, end supports, a column base, a back panel, a 9" or 24" modesty panel, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge. Shipped knocked down.

The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel; the electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.

For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with recessed leg on each end.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see Cable Capacity Charts in Kiosk.

Order optional screens separately:

- Arc screen (PH210. or PH211.)
- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Suspended storage products cannot mount under work surface.

Order optional components separately:

- Flipper door unit (PJ100.)
- Shelf (PJ500.)

### Product Information

#### Description

This peninsula desk module connects to another desk module on the left or right side. It has a work surface with an oblong peninsula, stanchions, a 29"-high filler kit, end supports, a column base, a back panel, a 9" or 24" modesty panel, electrical and cable management channels, and adjustable glides. The desk module is available with a fixed height of 29" or a height-adjustment range of 26" to 31" at 1" increments. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge. Shipped knocked down. The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel; the electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

- 13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see Passage Planning Guide.
- For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see Passage Planning Guide.
- For fixed-height desk module, specify module with left or right full end panel. For adjustable-height desk module, specify module with recessed leg on each end.
- To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.
- To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.
- When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.
- For additional power jumper, order power jumper (PG320.) separately.
- Order optional energy distribution components separately:
  - Voice/data cable manager (G1321.)
  - Work surface-attached electrical distributor (Y1314.)
  - Work surface-attached voice/data outlet (Y1320.)
- For cable capacity information, see Cable Capacity Charts in Kiosk.
- Order optional screens separately:
  - Arc screen (PH210. or PH211.)
  - Full-height screen (PH100.)
  - Glazed screen (PH300.)
  - Marker board screen (PH400.)
  - Stackable screen (PH200.)

Suspended storage products, except pencil drawer, cannot mount under work surface.

Freestanding pedestals can be used below work surface next to column base. To order optional freestanding storage products, see Meridian® Freestanding Storage.

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

Order optional components separately:

- Flipper door unit (PJ100.)
- Shelf (PJ500.)

### Product Information

#### Description

This peninsula desk module connects to a desk module on each side. It has a work surface with a round-end peninsula, stanchions, a 29"-high filler kit, 2 recessed legs, a column base, a back panel, electrical and cable management channels, and adjustable glides. The desk module has a height-adjustment range of 26" to 31" at 1" increments. The work surface is nonhanded and can be used as a conference area between 2 workstations. It has a laminate top and vinyl edge or a veneer top and wood composite edge. Shipped knocked down.

The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel; the electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see *Passage Planning Guide*. For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see *Passage Planning Guide*.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see *Cable Capacity Charts* in *Kiosk*.

Order optional stackable screen (PH200.) separately.

Suspended storage products cannot mount under work surface.

Freestanding storage products cannot be used below work surface.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

## Desk Module Extension

PB3LA.  
PB3LC.  
PB3LE.  
PB3VA.  
PB3VC.  
PB3VE.

### Product Information

#### Description

This desk module extension provides an end for a run of desk modules. It has a curved-end work surface, stanchions, a 29"-high filler kit, end supports, a back panel, electrical and cable management channels, and adjustable glides. The desk module has a height-adjustment range of 26" to 31" at 1" increments. It is available in 3 widths. The work surface has a laminate top and vinyl edge or a veneer top and wood composite edge.

The desk module is available nonpowered or powered. The powered modules have a single-sided harness installed in the electrical channel; the electrical harness has 2 receptacle locations. The powered modules also include a power jumper. The desk module and electrical components are UL listed, CSA certified, and have a Class A fire-retardant rating.

#### Notes

13"-high back panel with metal top and open bottom must be used against a wall. For additional information, see *Passage Planning Guide*.

For back-to-back reverse module applications that require power, specify powered with offset pass-through (F). For application information, see *Passage Planning Guide*.

To convert desk module supports, order support conversion kit (PL302., PL303., PL304., or PL305.) separately.

To convert open bottom back panel to full back panel, order back panel conversion kit (PL200., PL202., or PL203.) separately.

When specifying 13"-high back panel with metal top and open bottom, electrical channel is not included. Specify this option when desk module is used against a wall and when access to wall-mounted power and data is required.

For additional power jumper, order power jumper (PG320.) separately.

Order optional energy distribution components separately:

- Voice/data cable manager (G1321.)
- Work surface-attached electrical distributor (Y1314.)
- Work surface-attached voice/data outlet (Y1320.)

For cable capacity information, see *Cable Capacity Charts* in *Kiosk*.

Order optional screens separately:

- Full-height screen (PH100.)
- Glazed screen (PH300.)
- Marker board screen (PH400.)
- Stackable screen (PH200.)

Storage products cannot be used below or mount under work surface.

Order optional components separately:

- Flipper door unit (PJ100. or PJ110.)
- Shelf (PJ500. or PJ510.)

# Height-Adjustment Filler Kit

PL100.

### Product Information

#### Description

This filler kit covers the exposed section of a stanchion that sits above the work surface. It includes covers in 5 different lengths to accommodate work surfaces at 26", 27", 28", 30", and 31" high. A 29"-high filler kit is shipped with all desk modules. Finish is graphite.

#### Dimensions

### Specification Information

#### Step 1.

**PL100.**

#### Step 2. Usage

<b>C</b>	for corner or extended corner desk modules	\$51
<b>S</b>	for rectangular, curvilinear, or peninsula desk modules or desk module extension	\$38

# Straight Back Panel Conversion Kit

PL200.  
PL202.  
PL203.

Passage® Work Surfaces

## Product Information

### Description

This kit encloses an open bottom back panel on a straight-edge desk module or module extension. 17"-high panel kits include an electrical channel cover. Mounting hardware is included.

### Notes

13"-high metal back panel kit must be used against a wall. For additional information, see Passage Planning Guide.

For conversion kit application information, see Passage Planning Guide.

Passage® Work Surfaces

## Product Information

### Description

This 16"-deep surface mounts on desk module stanchions and can be used alone or with other transaction surfaces to create a continuous surface. It is available in 3 shapes and has a laminate top and vinyl edge or a veneer top and wood composite edge.

### Notes

Each round end extends 6" beyond the desk module end.

Desk module height (0.) mounts directly on 2 desk stanchions. This 32"-high surface (measured from floor to top of surface) allows wheelchair accessibility. Mounting hardware is included.

11" above desk module height (1.) mounts on 2 desk module stanchion extensions creating a 42"-high surface (measured from floor to top of surface). 10"-high stackable screen fits below transaction surface; order screen (PH200.10) separately. Stanchions and mounting hardware are included.

Passage® Work Surfaces

## Product Information

### Description

This 16"-deep surface mounts to desk module stanchions. It can be used alone or with other transaction surfaces to create a continuous surface. It is available in 3 shapes and has a laminate top and vinyl edge or a veneer top and wood composite edge.

### Notes

For corner transaction surface used with 18"-high screen on other side of corner desk module, specify width of transaction surface as 1" less to allow space in corner for 18"-high screen.

Each round end extends 6" beyond the desk module end.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

Desk module height (0.) mounts directly on 2 desk stanchions. This 32"-high surface (measured from floor to top of surface) allows wheelchair accessibility. Mounting hardware is included.

11" above desk module height (1.) mounts on 2 desk module stanchion extensions creating a 42"-high surface (measured from floor to top of surface). 10"-high stackable screen fits below transaction surface; order screen (PH200.10) separately. Stanchions and mounting hardware are included.

Passage® Energy Distribution

**Product Information**

**Description**  
 This power entry connects a building’s electrical supply from a wall, floor, or column to the electrical harness of a desk module. It is installed on the back side of the harness directly opposite the receptacle location. The power entry distributes 4 20-amp circuits. The cable is available in 4 lengths and can be field cut to the appropriate length. The power entry is UL listed and CSA certified.

**Notes**

Power entry must be field installed by licensed electrician. When facing desk module, connects to right side of harness.

Power Entry, Junction Box

PG220.

**Product Information**

**Description**

This power entry connects a building's electrical supply from a wall, floor, or column to a desk module. It distributes 4 20-amp circuits and includes a 60-cubic-inch junction box and harnesses to distribute power in both directions. The junction box has 6' of wiring that can be field cut to the appropriate length for connection to the building's power supply. The power entry provides receptacle access. It is UL listed and CSA certified.

**Notes**

- Conduit attachment into junction box is at bottom of junction box.
- Power entry must be field installed by licensed electrician.
- Power entry meets local codes including New York City.

Passage® Energy Distribution

Passage® Energy Distribution

**Product Information**

**Description**

This power entry connects a ceiling’s electrical supply to the end of a desk module. It distributes up to 4 20-amp circuits and holds up to 80 4-pair cables. The power entry has a 10½”-high pole that can be field cut to the appropriate length, ceiling and base trim, connecting hardware, conduit, and a factory-installed electrical harness that connects to the desk module’s power harness. Finish is graphite. It is UL listed and CSA certified.

**Notes**

Internal electrical wires must be installed in conduit to separate electrical and data cables.

Power entry must be field installed by licensed electrician.

For cable capacity information, see Cable Capacity Charts in Kiosk.

# Receptacle, 4 Circuit, 15 Amp

K1311.

## Product Information

### Description

This receptacle locks into the electrical harness of the following powered products: Action Office® Series 2 or Prospects® cable management panel frame, Prospects panel, Action Office Series 2 thin base panel, Passage® desk module, or Abak® access zone power harness. It provides power to equipment with a 15-amp standard plug head or cap. Package contains 6 receptacles. It is UL listed and CSA certified.

### Notes

For information on types of receptacles and their applications, refer to individual product planning guides.

When specifying for Action Office Series 2 cable management panel frame, order 4-circuit receptacle (K1311). When specifying for all other Series 2 panels, order 4-circuit receptacle (A1311.) or 20-amp 4-circuit receptacle (X1311.).

Receptacle is used with an Abak access zone power harness (AK132.) used in access zone cladding (AK151.).

# Receptacle, 4 Circuit, 20 Amp

X1311.

Passage® Energy Distribution

## Product Information

### Description

This receptacle locks into a 4-circuit electrical harness to provide power to equipment with a 20-amp standard plug head or cap. It also accepts 15-amp standard plug heads or caps. The receptacle is UL listed.

### Notes

Receptacle cannot be used with hard-wired frame.

Avoid overloading circuit by ensuring total connected load does not exceed 16 amps. If 1 piece of equipment requires all available power, do not use receptacle's second outlet or install additional receptacles on that circuit. In many cases, equipment requiring this receptacle will use all available power.

For information on types of receptacles and their applications, refer to individual product planning guides.

When locked into electrical harness of Action Office® Series 2 or Prospects® powered cable management panel frame, Prospects® powered panel, or Passage® powered desk module, receptacle extends 5/8" from cable management panel face, trim cover, channel, or power channel trim cover.

Receptacle works with an Abak® power harness (AK131.) used in lower cladding (AK150.) or in powered utility cladding (AK153.). Receptacle should not be used with access zone power harness (AK132); order receptacle K1311. for this application.

# Communication Port Faceplate Reducer

G1189.

## Product Information

### Description

This faceplate fits into a communication port cutout and reduces the size of the cutout to fit specific telecommunications outlet/connector faceplates. Finish is black. Package contains 6.

Faceplate fits into the following communication port cutouts:

- Abak® lower cladding, powered utility cladding, or data faceplate bracket
- Action Office® Series 2, Prospects®, or Ethospace® cable management side cover
- Action Office Series 2 or Prospects cable management panel face
- Ethospace cable-access tile upper port
- Passage® data cover
- Vivo® communication port cutouts

### Notes

Purchase preconfigured voice/data outlets/connector faceplates separately from their manufacturers.

Order appropriate Abak products separately for use with faceplate:

- For lower cladding, order power option with communication port locations (AK150.PA or AK150.PD)
- For utility cladding, order powered option (AK153.)
- For data faceplate bracket, order bracket (AK134.)

When specifying faceplate for Action Office Series 2 panel, Prospects panel, or Ethospace frame, order “J” or “G” power option with communication port locations.

When specifying faceplate for Action Office Series 2 or Prospects cable management panel, order panel face side 1 (A1181.C or K1181.C) and side 2 (A1182.C or K1182.C) separately.

When specifying faceplate for Ethospace grooved face tile or frame with grooved side covers, order both reducer (G1189.A) and extender (G1189.B).

## Dimensions

# Communication Port Faceplate Reducer *continued*

## Specification Information

**G1189.A**

\$38

# Communication Port Faceplate Extender

G1189.

## Product Information

### Description

This faceplate fits over the communication port cutout of the following products: Action Office® Series 2, Prospects®, or Ethospace® cable management side cover; Action Office Series 2 or Prospects cable management panel face; Ethospace cable access tile upper port; Resolve® data faceplate housing; Passage® voice/data outlet; or an Abak® lower cladding, powered utility cladding, or data faceplate bracket. It allows installation of specific cable communication modules without interfering with cable distribution capacity. Attachment hardware is included. Package contains 6.

### Notes

Purchase preconfigured voice/data modules/faceplates separately from their manufacturers.

When specifying faceplate for Action Office Series 2 panel, Prospects panel, or Ethospace frame, order “J” or “G” power option with communication port locations.

When specifying faceplate for Action Office Series 2 or Prospects cable management panel, order panel face side 1 (A1181.C or K1181.C) and side 2 (A1182.C or K1182.C) separately.

When specifying faceplate for Ethospace grooved face tile or frame with grooved side covers, order both reducer (G1189.A) and extender (G1189.B).

When specifying faceplate for Resolve data faceplate housing, order housing (R1360.) separately.

Order appropriate Abak products separately for use with faceplate:

- For lower cladding, order power option with communication port locations (AK150.PA or AK150.PD)
- For utility cladding, order powered option (AK153.)
- For data faceplate bracket, order bracket (AK134.)

## Product Information

### Description

This fabric screen attaches to other full-height screens or to a desk module. It creates standing and seated privacy and divisions within an environment. The screen has graphite trim finish, tackable surfaces, a top end cap, and adjustable glides. It is available in 3 heights.

### Notes

To connect screens in a straight line or at 90° angles, order screen-to-screen connector (PH910.) separately.

To connect screen to desk module, order screen-to-desk module connector (PH920.) separately.

For added stability on a run of screens, order full-height screen stabilizer (PH980.) separately. For application information, see Passage Planning Guide.

Fabrics are applied vertically, from top to bottom, on screen. See Order Information in Appendices.

Screen accepts Customer's Own Material (COM). Yardage is estimated for nondirectional, 54"-wide fabrics.

### Width—Yardage

24" to 42"—4

For information on multiple quantities or directional fabrics, contact COM Department. See Order Information in Appendices.

# Full-Height Screen with Cable Pass-Through

PH110.  
PH111.  
PH112.

### Product Information

#### Description

This fabric screen attaches to a desk module and provides side privacy between 2 desk modules. It creates standing and seated privacy and divisions within an environment. The screen has graphite trim finish, tackable surfaces, a top end cap, an opening for cable and electrical pass-through, and adjustable glides. It is available in 3 heights. Attachment hardware is included.

#### Notes

To connect screens in a straight line or at 90° angles, order screen-to-screen connector (PH910.) separately.

To pass power through screen, order power jumper (PG320.18) separately.

Fabrics are applied vertically, from top to bottom, on screen. See Order Information in Appendices.

Screen accepts Customer's Own Material (COM). Yardage is estimated for nondirectional, 54"-wide fabrics.

#### Width—Yardage

### Product Information

#### Description

This fabric screen attaches to a desk module or stacks on top of another 18"-high stackable, glazed, or marker board screen. It is tackable on both sides and includes hardware to support screens connected side by side. The screen's trim finish is graphite and the screen is UL listed. It cannot stack on top of an arc screen or 10"-high screen. Attachment hardware is included.

#### Notes

For screens in corner of desk module, specify beveled edge for corner.

For screen on straight edge of desk module, specify straight edge (S).

When screen is used on only 1 side of corner desk module, specify straight edge (S).

Fabrics are applied horizontally, from left to right, across width of screen. See Order Information in Appendices.

Screen accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics.

# Flipper Door Unit

PJ100.  
PJ101.

## Product Information

### Description

This lockable storage unit mounts on 2 straight stanchions of a desk module and has a painted, fabric, or veneer front. The 14<sup>1</sup>/<sub>8</sub>"-deep shelf and flipper door enclose standard- or international-size papers and binders, files, and other items. It mounts in 1 of 2 positions: the forward position allows a screen to be mounted behind the unit; the back position places the unit flush with the back of the desk module.

Stanchions and attachment hardware are included.

The unit is available with 2 door mechanisms: a standard lift/standard close mechanism and a weight-reduced lift/soft close mechanism. 54"-to 78"-wide units have 2 doors. The underside of the shelf conceals the lock and accepts a fully recessed task light.

### Notes

Order optional task lights separately:

- Energy-efficient task light (G6120.)
- Performance task light (G6114.)
- Utility task light (G6136.)

Fabrics are applied horizontally, from left to right, across width of flipper door. See Order Information in Appendices.

Fabric-covered flipper door accepts Customer's Own Material (COM).

Yardage is estimated for directional, 54"-wide fabrics.

### Width—Yardage

- 24" — 1
- 30" — 1
- 36" — 1<sup>1</sup>/<sub>4</sub>
- 42" — 1<sup>1</sup>/<sub>3</sub>

# Corner Flipper Door Unit

PJ110.  
PJ111.

Passage® Storage

## Product Information

**Description**  
This left- or right-handed lockable storage unit mounts on 1 straight stanchion and 1 corner stanchion of a corner, extended corner, or extended curvilinear corner desk module and has a painted, fabric, or veneer front. The 14 1/8"-deep shelf and flipper door enclose standard- or international-size papers and binders, files, and other items. It mounts in 1 of 2 positions: the forward position allows a screen to be mounted behind the unit; the back position places the unit flush with the back of the desk module. Stanchions and attachment hardware are included. The unit is available with 2 door mechanisms: a standard lift/standard close mechanism and a weight-reduced lift/soft close mechanism. 53"-to 78"-wide units have 2 doors. The underside of the shelf conceals the lock and accepts a fully recessed task light.

## Notes

For corner flipper door unit used with 2 stacked screens on opposite side of corner desk module, specify flipper door width as 1" less to allow space in corner for top screen.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

Order optional task lights separately:

- Energy-efficient task light (G6120.)
- Performance task light (G6114.)
- Utility task light (G6136.)

When ordering energy-efficient task lights (G6120.), specify light width as follows:

- Corner Flipper Unit Width—Task Light Width
- 41" or 42"—36" or less
  - 47" or 48"—42" or less
  - 53", 54", 59", or 60"—48" or less
  - 65", 66", 71", 72", 77", or 78"—60" or less

Fabrics are applied horizontally, from left to right, on flipper door. See Order Information in Appendices.

Fabric-covered flipper door accepts Customer's Own Material (COM).

Yardage is estimated for directional, 54"-wide fabrics.

- Width—Yardage
- 41" and 42"—1 1/3
  - 47" and 48"—1 1/2
  - 53" and 54"—1
  - 59" and 60"—1
  - 71" and 72"—1 1/4
  - 77" and 78"—1 1/4

For information on multiple quantities or directional fabrics, contact COM Department. See Order Information in Appendices.

For keyed-alike locks, order lock plugs separately. See Keyed-Alike Information in Appendices.

# Shelf

PJ500.

### Product Information

#### Description

This 14 1/8" deep shelf mounts on 2 straight stanchions of a desk module. It mounts in 1 of 2 positions: the forward position allows a screen to be mounted behind the unit; the back position places the unit flush with the back of the desk module. The underside of the shelf accepts a fully recessed task light. Stanchions and attachment hardware are included. Shipped knocked down.

#### Notes

Order optional task lights separately:

- Energy-efficient task light (G6120.)
- Performance task light (G6114.)
- Utility task light (G6136.)

# Corner Shelf

PJ510.

### Product Information

#### Description

This 14 1/8"-deep, left- or right-handed shelf mounts on 1 straight stanchion and 1 corner stanchion of a corner, extended corner, or extended curvilinear corner desk module. It mounts in 1 of 2 positions: the forward position allows a screen to be mounted behind the unit; the back position places the unit flush with the back of the desk module. The underside of the shelf accepts a fully recessed task light. Stanchions and attachment hardware are included. Shipped knocked down.

#### Notes

For corner shelf used with 2 stacked screens on opposite side of corner desk module, specify width as 1" less to allow space in corner between shelf and screens.

Corner desk module cannot be installed with a corner flipper door unit or corner shelf and a corner transaction surface on the same desk module corner stanchion. Corner stanchion only accepts 1 of these components.

Order optional task lights separately:

- Energy-efficient task light (G6120.)
- Performance task light (G6114.)
- Utility task light (G6136.)

When ordering energy-efficient task lights (G6120.), specify light width as follows:

Corner Shelf Width—Task Light Width

41" or 42"—36" or less

47" or 48"—42" or less

53", 54", 59", or 60"—48" or less

65", 66", 71", 72", 77", or 78"—60" or less

# Work Surface-Attached Tool Rail Y7000.

## Product Information

### Description

This metal rail attaches with C-clamps to the back edge of an Action Office® Series 2 squared-edge work surface, Ethospace® work surface without a cable management trough, Passage® work surface, Abak® surface, or squared-edge freestanding surface. It has 6 horizontal rails to hold work tools.

### Notes

When attaching to Passage surface, 14" rail fits on 30"-wide or larger desk module; 29" rail fits on 42"-wide or larger desk module.

When attaching to Action Office Series 2, Ethospace, or Abak surface, 14" rail fits on 24"-wide or wider work surface. 29" rail fits on 36"-wide or wider Action Office, Ethospace, or Abak surface.

For accessory product applications, the following Compatibility Charts are available electronically for viewing and printing in Kiosk and HermanMiller.com: Keyboard Compatibility Charts, Pencil Drawer Compatibility Charts, and Work Organizer Compatibility Chart.

# Twist™ LED Task Light

G6160.

### Product Information

#### Description

This light mounts under a flipper door unit, storage unit, shelf or any other surface to light the work area. It has an aluminum extruded housing, poly-carbonate lens, and 2 linear light-emitting diodes (LED). The light can be rotated 45 degrees forward and backward by the user to direct light where desired. The LEDs consume 9.5 watts of power. The light has an 11' cord and is UL listed, UL Canada listed, and CSA certified. Attachment hardware and adhesive cord clips included.

#### Notes

Specify magnetic attachment option (M) for attaching the light to any metal surface. Specify bracket attachment option (B) for attaching the light to a wood or wood composite surface.

Starter unit (B) is designed for use as a daisy chain with up to 3 add-on units (C).

Multiple lights can be specified for use under 48"- and 60"-wide storage units/shelves.

Light meets local codes for Canada, New York City, and Chicago.

Passage® Lighting

## Product Information

**Description**  
This light mounts under a flipper door unit, sliding door storage unit, or shelf to uniformly light a work surface. It has an instant-start electronic ballast, T8 lamp with a 3500° Kelvin color temperature, and batwing lens. The light is UL listed and CSA certified. Mounting hardware and 3 cord management clips are included.

The 24"-wide light includes 1 preheat fluorescent lamp; 30"- to 60"-wide lights include 1 rapid-start fluorescent lamp.

The task light has the following unit widths:

Task Light Width—Unit Width

- 24"—20.77"
- 30"—26.77"
- 36"—32.77"
- 42"—38.77"
- 48"—44.77"
- 60"—56.77"

## Notes

For light used with Ethospace® utility shelf (E3234.) or C-style storage (X3750. and X3730.), specify bracket option (Q).

When specifying energy-efficient task lights for use on Passage® corner flipper door units (PJ110. and PJ111.) or corner shelves (PJ510.), specify light width as follows:

Task Light Width— Corner Flipper Unit or Shelf Width

- 36" or less—41" or 42"
- 42" or less—47" or 48"
- 48" or less—53", 54", 59", or 60"
- 60" or less—65", 66", 71", 72", 77", or 78"

## Performance Task Light

G6114.  
G6115.  
G6116.  
G6117.

### Product Information

#### Description

This light mounts under a flipper door unit, sliding door storage unit, shelf, transaction surface, or Corian® counter top to light the work area. It has a normal-power-factor electronic ballast or a high-power-factor electronic ballast, T5 lamp with a 3500° Kelvin color temperature, and a K-25 batwing lens. All lights are UL listed for USA and Canada. Mounting hardware and 3 cord management clips are included.

The 60"-wide light can be specified only with a 60"-wide flipper door unit or shelf; smaller lights cannot mount under 60"-wide storage products.

The task light has the following widths:

Width—Actual Width—Application

24"—13"—24"-wide storage

30"—24"—30"- or 36"-wide storage

42"—35"—42"- or 48"-wide storage

60"—46"—60"-wide storage

The daisy-chain system allows a run of lights to be operated from a single power source. A series of add-on lights is plugged into 1 starter light to operate up to 10 lights from a single outlet; each light has an independent on/off switch.

The daisy-chain add-on lights have the following cord lengths:

Light Width—Cord Length

24", 30", and 42"—42"

60"—78"

#### Notes

24"-wide light has a T5 lamp with a 4100° Kelvin color temperature.

For 5000 Series product applications, order cable manager (part # UMLo2F) separately.

Passage® Lighting

# Utility Task Light

G6136.  
G6137.

### Product Information

#### Description

This light mounts under a flipper door unit, sliding door storage unit, shelf, transaction surface, or Corian® counter top to light the work area. It has a normal-power-factor electronic ballast, T5 lamp with a 3500° Kelvin color temperature, and prismatic lens. All lights are UL listed for USA and Canada. Mounting hardware and 3 cord management clips are included. Finish is black.

The 60"-wide light can be specified only with a 60"-wide flipper door unit or shelf; smaller lights cannot mount under 60"-wide storage products.

The task light has the following unit widths:

Width—Actual Width—Application

24"—13"—24"-wide storage

30"—24"—30"- or 36"-wide storage

42"—35"—42"- or 48"-wide storage

60"—46"—60"-wide storage

#### Notes

24"-wide light has a T5 lamp with a 4100° Kelvin color temperature.

For 5000 Series product applications, order cable manager (part # UMLo2F) separately.

# Leaf® Personal Light

G6510.

## Product Information

### Description

This light sits on a surface. It has 20 energy-efficient light-emitting diodes (LEDs) that provide lighting without glare and without emitting heat. The light has touch controls for adjusting the light intensity and color temperature. The color temperature can be adjusted from 2800 to 6000 Kelvin. The LEDs consume 8 watts and the light has an 11' black cord. It is UL listed, UL Canada listed, CSA certified, and conforms to CE directives.

The adjustable upper and lower blades allow light to be directed. The upper blade pivots 210° and extends up to 36½". The lower blade swivels 180° and pivots 27½° forward and 23° backward. The blades and base are matching colors except for polished aluminum blades, which have a black base.

### Notes

Light meets local codes including Canada, New York City, and Chicago. To emit ambient lighting, fold upper blade close to lower blade. For wall-wash light, pivot upper blade straight up.

# Ardea® Personal Light

Y6460.

### Product Information

#### Description

This light hangs from a panel, frame, or rail tile; clamps to surface; or sits on a surface. It has an energy-efficient 13-watt compact fluorescent lamp with a 3500° color temperature. It has a 120-volt magnetic ballast with a disconnect plug next to the ballast. The light extends up to 25", rotates 360°, and has an 8' 6" cord. The flexible design allows light to be directed. Mounting hardware is included.

#### Notes

Light has a .3-amp draw.

Light cannot mount in 90° corner or at an Action Office®, Ethospace®, or Vivo® 120° connection.
