Introduction

A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

This book is effective July 5, 2023, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices in US Dollars. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

Bar-Pull Freestanding Lateral File

LK20D.
LK20H.
LK20L.

Product Information

Description

This lateral file has a painted, laminate, or veneer front, smooth-steel case, and applied metal bar pulls. It includes 1" leveling glides and a positive interlock system that permits only 1 drawer or pullout shelf to open at a time. Drawers can be specified with side-to-side or front-to-back filing rails to accommodate letter-, legal-, and A4-size hanging files. The pullout shelf includes 3 file dividers.

Actual file depth is 19³/₈". Actual file width is 29⁵/₈", 35⁵/₈", or 41⁵/₈".

Interior height of the flipper door with pullout shelf is 10¹/₄". Raised-height configuration adds 1/2" to overall height to fill the space between the top of the file and the underside of a surface.

Notes

Base and pull heights on 2 drawers, raised height option (1) align with bar pull Tu® storage towers.

2- or 3-high files that are not ganged or anchored require counterweights (option CB). When two 42"-wide, 4-high files are ganged side by side, each file requires a counterweight.

Counterweight specified with file is permanently installed. To order removable counterweight, specify file with no counterweight (option NO), and order counterweight (LG909.) separately.

Veneer-front lateral files have a vertical grain direction.

Order optional accessories separately:

- File drawer organizer (LG901)
- Front-to-back filing rail (LG904.)
- Movable divider (9M100) - For flipper door with pullout shelf only
- Side-to-side filing rail (LG902.)

For keyed-alike locks, order lock plugs separately. See Keyed-Alike Information in Appendices.

Product Information

Description

This lateral file has a painted, laminate, or veneer front, smooth-steel case, and applied metal arc pulls. It includes 1" leveling glides and a positive interlock system that permits only 1 drawer or pullout shelf to open at a time. Drawers can be specified with side-to-side or front-to-back filing rails to accommodate letter-, legal-, and A4-size hanging files. The pullout shelf includes 3 file dividers.

Actual file depth is 19³/₈". Actual file width is 29⁵/₈", 35⁵/₈", or 41⁵/₈".

Interior height of the flipper door with pullout shelf is 10¹/₄". Raised-height configuration adds 1/2" to overall height to fill the space between the top of the file and the underside of a surface.

Notes

Pull design conforms to guidelines of Americans with Disabilities Act (ADA).

Base and pull heights on 2 drawers, raised height option (1) align with arc pull Tu® storage towers.

2- or 3-high files that are not ganged or anchored require counterweights (option CB). When two 42"-wide, 4-high files are ganged side by side, each file requires a counterweight.

Counterweight specified with file is permanently installed. To order removable counterweight, specify file with no counterweight (option NO), and order counterweight (LG909.) separately.

Accepts Tu® add-on cushion top (LG891.).

Veneer-front lateral files have a vertical grain direction.

Order optional accessories separately:

- File drawer organizer (LG901)
- Front-to-back filing rail (LG904.)
- Movable divider (9M100) - For flipper door with pullout shelf only
- Side-to-side filing rail (LG902.)

For keyed-alike locks, order lock plugs separately. See Keyed-Alike Information in Appendices.

Ordering Products with COM

1. Refer to the specific products to determine the yardage required for COM textiles.
Note: Yardage requirements are based on nondirectional, 54"-wide textiles. 66"-wide textiles are needed for application on 60"-wide products. Additional yardage may be needed due to the unique characteristics of a textile.
2. Obtain the COM ID# in Omni. If the color you are ordering does not have a COM ID# assigned, click "Create ID".
3. Enter your order on Order Manager in Omni.
4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the Herman Miller products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 ext 6543400.
Products will be scheduled for production when COM textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Supplier Connection

Program Overview

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from Maharam, Camira, C.F. Stinson, Guilford of Maine, Luna Textiles, Momentum Textiles and Ultrafabrics. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:
(616) 654 3400
(866) 854 3048 ext 6543400

Supplier Connection Warranty

Textiles purchased by Herman Miller through the Supplier Connection program are COM and are not warranted by Herman Miller. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Supplier Connection Pricing

Textiles purchased by Herman Miller through the Supplier Connection program are COM. COM is a Category 1 fabric. There are no application charges for COM fabrics.

Payment for textiles purchased by Herman Miller through the Supplier Connection program is the responsibility of the customer or dealer. Herman Miller will invoice the order at a total product cost based on the supplier’s price published at the time of the order.

Textile Approval

1. Select a COM textile and a Herman Miller product.
2. If your textile does not show as tested in Omni, submit a request. You will be required to select a specific color of the textile and feature of the product to test, i.e., seat, back, etc.
3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with Supplier Connection COM

1. Identify and include the following information on your purchase order:
 - Product number and option
 - Herman Miller’s COM identification number
2. Enter your order on Order Manager in Omni.
3. Upon receipt of the purchase order, Herman Miller will process your order and send you a PO acknowledgment. Herman Miller will determine the yardage required to produce your product and will order and schedule for delivery the required textile. Standard lead times in effect at the time the textile is allocated at the supplier will apply to products ordered through this program.
