

People + Pedagogy + Place = Possibilities

Change is a constant on today's campus. It's occurring in classrooms, libraries, residence halls, and is the very nature of learning and teaching. As this change accelerates, campus spaces continue to play a key role in attracting and keeping students and projecting a school's spirit, culture, and image.

Herman Miller works closely with college and university leaders to address change on campus. We have since the 1970s. Our problem-solving, research-driven approach keeps us in tune with the evolving trends and issues and the leaders charged with addressing them. Every solution we present considers the type of pedagogy taking place today—and beyond—to create learning spaces that respond to changes in teaching and learning.

EDUCATION SOLUTIONS

We believe learning spaces are the sum of people, pedagogy, and place. When these are combined in a way that's right for the institution, the possibilities can enrich teaching and learning for students, faculty, administrators, and the community. It's part of how we're working for a better world around you.

Our Commitment. Building on our leadership in Higher Education Research pertaining to teaching, learning, and space on campus.

- Annual Roundtable Events building tighter relationships with Higher Education Leadership
- Member, active partner, of Higher Education related organizations as well as regular concurrent speaker. Organizations include: Society for College and University Planning (SCUP), EDUCAUSE, League for Innovation in the Community College (LFI), National Association of Educational Procurement (NAEP), PKAL
- Research partner for SCUP (Learning Space Factors Survey 2006, 2008, 2009) and EDUCAUSE
- Sharing knowledge and insights that help our clients realize possibilities within their spaces.
- Research Summaries, Case Studies, Solution Essays designed to share best practices and guide clients towards their own possibilities
- Client Discovery Tools: Higher Ed Realities Banner, Scenario Planning, CEU accredited presentations
- Quarterly newsletter, quarterly webinars designed to share relevant information with the Higher Ed community
- The Equation: People + Pedagogy + Place = Possibilities
- Innovation through Programmable Environments

Our Leadership. Proof of our leadership in learning spaces is evident in the Learning Studio Research Program. Herman Miller collaborates with Higher Education leaders to not only create new approaches to their learning spaces, but also measure effectiveness through ongoing research that measures the impact of these spaces on learning.

Building great spaces is one thing, proving they make a difference is quite another. The key benefit of the program is that participating institutions can test new approaches to learning spaces concepts before making larger-scale decisions about learning space design.

Your Result. When you work with us, you get the strength of our belief about, our commitment to, and our leadership in using place to enhance the learning experience. Here is a sampling of institutions that have enjoyed the results of working with us:

- Butler Community College
- University of Michigan
- University of Arkansas
- Michigan State University
- Georgia Tech University
- Arizona State University
- Carnegie Mellon University
- Notre Dame
- Purdue University
- Oregon State
- University College London
- Harvard University
