Aeron® Chair Care and Maintenance

With regular care and maintenance, your Herman Miller Aeron Chair will provide many years of superior performance and satisfaction. To maintain the quality of your Herman Miller product, please follow the cleaning procedures outlined here.

Base, Frame, and Armpads

Normal Cleaning

Wash surface with a soft cloth soaked in mild detergent and warm water. Rinse thoroughly and dry with a soft cloth

Do not use solvents or abrasive kitchen cleaners.

Polished Aluminum Base

Normal Cleaning

Apply a pre-soffened paste wax to polished aluminum components following the manufacturer's instructions.

In humid atmospheres near salt water, apply the wax once a month.

In other areas, apply wax every three months to maintain the appearance of the aluminum.

Suggested Paste Wax

Meguiar's Cleaner Wax *(paste or liquid)*

The instructions for the care and maintenance of Herman Miller Products are provided to you as a service.
No warranty is implied since results may vary.

8Z Pellicle® Suspension Material

Normal Cleaning

Vacuum fabric as needed using and upholstery attachment.

Vaccuming picks up dust and reduces the need for professional cleaning.

Do not brush fabric or use a vacuum attachment with a rotary brush. Brushing may permanently damage the nap or change the character of the fabric.

Oil-based Stains such as lipstick, grease, or salad dressing

Use a dry cleaning solution applied with a damp clean cloth or sponge.

Test the cleaning solution on a small, concealed area first.

If there is no spotting, ringing, or dama**g**e to the fabric or its dyes, apply the cleaning solution to the soiled area with light, quick strokes.

Begin at the outside of the stain and work toward the center, being careful not to over-saturate the fabric.

K2R is a product that can be used. See product label for complete instructions.

Do not over apply water or any liquid solution to fabric. Excessive wetting of the fabric with any liquid solution may result in permanent damage to the material.

Serveral light applications are better than one heavy application.

Do not rub too vigorously or you may damage the nap of the fabric or break fibers.

Soak up all remaining solution and then use another clean cloth or sponge dipped in cool water to remove any residue.

Let fabric dry thoroughly and then vacuum well before using.

If the stain resists cleaning, contact a professional cleaner.

Spot Cleaning

Immediately soak up the stain with a soft absorbent cloth.

Do not dry the stain completely or it may set. The longer a stain is allowed to remain on a fabric the more dificult it is to remove.

Large Areas

If large areas are soiled, contact a professional cleaning firm.

Water-based Stains of coffee, soft drinks, fruit juices, or milk

Use a water-based cleaner (specifically made for cleaning fabric) or a solution of mild (alkaline) warm soapy water (not overly soapy) applied with a damp clean cloth or sponge.

Work the cleaner into a lather or foam.

Soak up all remaining solution and then use a clean cloth or sponge dipped in cool water to remove any residue.

Never use hot water, it will set the stain. Avoid scrubbing.

Leather Armpads

Normal Cleaning

Vacuum or dust frequently with a clean, dry cloth.

If Leather is soiled, it can be wiped with a soft, damp cloth and a lather of any mild soap and a minimum amount of lukewarm water.

Wipe clean with a damp cloth and ry with a clean, soft cloth.

Do not spot clean leather; clean the entire surface.

Spots and Spills

Wipe excess liquid immediately with a clean cloth or sponge; let the leather air dry.

If further cleaning is necessary, sponge the entire surface - seat or back - with clean, lukewarm water. Let the leather air dry; never use a hair dryer or other heat source to dry leather.

Stubborn Spots and Stains

Apply a mild, non abrasive soap solution with a clean, wet sponge. Rinse well and let air dry.

Butter, Oil or Grease

Wipe the leather with a clean, dry cloth and let the remainder of the oil dissipate into the leather.

Do not apply water or try to wash a grease spot.

Do not use saddle soap, cleaning solvents, oils, furniture polishes, varnishes, abrasive cleaners, detergents, or ammonia on leather; they will ruin the finish, causing it to become sticky and cracked.

If the stain remains, contact a professional cleaning firm..

Large Areas

If large areas are soiled, contact a professional cleaning firm.
