

Performance Textiles

At Herman Miller, we're committed to designing a better world. Our performance textiles solve the problems our customers face in workspace and clinical environments: cleanability, bacterial resistance, moisture resistance, and breathability.

Striving for a better world impacts how we develop product. We have identified technologies that offer the best environmentally optimized solutions available today. These technologies were employed in the design and engineering of textiles in the Herman Miller Group.

Our growing collection of performance textiles exceed the Association for Contract Textiles (ACT) standards for heavy duty use. Each have their own performance attributes that offer various benefits for healthcare environments, cafeterias, collaborative spaces, and other high traffic areas.

Maharam	Cursive 7CW00	Woven	67% Solution-Dyed Acrylic, 33% Solution-Dyed Polyester	PFOA-Free Stain Resistant		Seating, Ancillary Seating	Yes	No	Yes

* Herman Miller Terra 4TE00 with 100% Post-Consumer Recycled Biodegradable Polyester:
Rate and extent of biodegradation into elements found in nature is 91% after 1,278 days under ASTM D5511
(Anaerobic Biodegradation of Plastic Materials Under High Solids Anaerobic Digestion Conditions).
The test was done with the same component (PET) polyester and biocatalyst additive. No evidence of further degradation.

Textile Characteristics

Stain Repel and Release

A coating or other treatment applied to a fabric for improved soil and stain resistance. Stain repel and release finishes help to prevent liquids from penetrating the textile and enhance cleanability.

This includes textiles with BLOCKaide, Crypton, Crypton Green, Protective Topcoat, Resilience finishes, and textiles identified as PFOA-Free Stain Resistant.

Ink and Stain Resistant, Ink Resistant Protective Top Coat, and Writer's Block also provide stain repel and release.

Moisture Barrier

A moisture barrier is a finish applied as a film or coating to the back of a textile that does not allow a liquid to pass through.

Moisture barriers prevent penetration of liquids, enhance cleanability, and prolong furniture life.

Polyurethane, Vinyl, and Silicone textiles have a coating or backing providing a moisture barrier.

Bleach Cleanable

A bleach cleanable textile does not fade or weaken when cleaned with a solution of one part household bleach to ten parts water.

Textile Product Applications

To find what products Herman Miller Group performance textiles can be applied to, please refer to the Performance Textiles Application Charts on hermanmiller.com.

Warranty Information

Herman Miller Proprietary Performance Textiles 12 Years

Products sold under the Herman Miller brand, including Herman Miller products, Geiger products, Eames Aluminum group, Eames Soft Pad group, Eames Executive chairs, are backed by our 12-year, 3-shift warranty.

Geiger Textiles 5 Years

Geiger Textiles guarantees these products will perform in accordance with accepted industry standards when used under normal conditions, during single shift operation, with proper maintenance and for the purpose intended.

Maharam 5 Years

Maharam guarantees that its products will perform in accordance with accepted industry standards when used under normal conditions, during single shift operation, with proper maintenance and for the purpose intended.
