Introduction

A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

Rectangle Table with C-Foot DW6ACS

Product Information

Description

This rectangular height-adjustable table has a C-leg configuration and laminate top with square thermoplastic edge or a laminate top with a thermoplastic backed plywood edge. It comes with a simple up/down switch for height adjustment. Glides have $^1/_2$″ leveling range. Shipped knocked down. Product is UL Listed.

Notes

Sizes listed for table depth and width are nominal. Depth of surface is reduced 1″ for cord management. Width of surface is reduced 2″ to minimize possible pinch point hazards.

Legs are nearly flush with sides of the surface for maximum knee clearance.

Table cross beam acts as the stiffener and provides a small cavity for cable management.

Tables 48″-60″ wide do not need a cross beam; tables 66″ wide and 72″ wide require a cross beam.

Floor to top-of-surface height adjustment range is $28^1/_2$″-$47^3/_8$″ for the electric standard range (E) option, and $22^1/_2$″-$48^1/_2$″ for the electric extended range (D) option.

MicrobeCare™ is an antimicrobial coating that can be applied to a wide variety of Herman Miller Group surfaces to protect products from mold, mildew, algae, and bacteria that cause deterioration, discoloration, odors, and stains.

MicrobeCare™ is a US Environmental Protection Agency (EPA) registered nonpublic health antimicrobial.

Screens 54" wide and wider include an additional 1"-wide center mounting bracket.

Recommended mounting creates a 1" gap between back edge of surface and the screen to accommodate cable routing and the attachment or clamp-mounting of other hardware to the surface.

Optional cable management trough is only available when specifying privacy & modesty height option (13B). Trough finish is graphite.

Attachment brackets are inset from edge of screen by approximately 8" and require $2^1/_2$" of work surface for attachment.

Attachment bracket finish is painted graphite.
