A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

General Information

This book is effective October 6, 2025, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

Support Bracket, Low Credenza-to-Frame

FT292.

Product Information

Description

This bracket attaches between a Canvas wood or metal credenza and a frame. It allows the credenza to attach parallel or perpendicular to the frame, providing support to a frame run in place of a return wall or work surface support.

Notes

Bracket attaches credenza with no gap or with a 1" gap from the front of the frame to allow room for cords and cables.

Support bracket attaches to low credenza with 4" foot and thin top only.

Support bracket also attaches to back of a 60" wide or wider low credenza where 2 units are joined.

Support bracket orientation (left or right) is determined by the frame orientation as you are facing the frame. Credenza can be attached parallel or perpendicular to a frame. Bracket attaches to the back left or back right of the low credenza.

Product Information

Description

This sliding door provides enclosure and added privacy to a workstation. It has an aluminum frame, urethane wheels, and a fabric or plastic infill. The door attaches to an equal-height frame and is specified to close to the left or right. The lock option locks the door from outside the workstation; a built-in safety feature allows the door to be unlocked from the inside. The floor track minimizes wear on carpet and ensures proper alignment. Floor track is anodized aluminum.

Door handle and lock assembly conform to the Americans with Disabilities Act (ADA) guidelines.

Notes

Door and adjacent frames must be the same height.

To use privacy door with architectural trim, order frame top cap, architectural, privacy door (FT11B.) separately.

A 36"-wide door attaches to a 42"-wide or wider frame combination. A 42"-wide door attaches to a 48"-wide or wider frame combination.

Door closure direction is identified when facing the door from outside the workstation. A left door attachment (L6) attaches to a frame on the left and closes to the right. A right door attachment (R6) attaches to a frame on the right and closes to the left.

Door direction cannot be reversed in the field.

Privacy door is not compatible with frames with architectural feet, to-the-floor tiles, or 120° connectors.

Privacy door lock post is not compatible with 22" high thin profile stacking window (FT187.22xx).

Fluted translucent infill option (FW) has a Class A fire-retardant rating.

For fluted translucent infill option (FW), flute direction is vertical.

Clear (TR) and opal frosted (J9) infills are acrylic.

Opal frosted (J9) infill complements opal glass.

For keyed-alike locks, see Keyed-Alike Information in Appendices.

Product Information

Description

This hardware kit connects a return frame to a spine wall frame at 90° in an off-module application. It works with open base frames, frames with architectural feet, and frames with base covers.

Notes

Option A is used with frames with standard top caps to connect an equal-height return frame anywhere along a spine wall frame when an off-module upper tile is not used. Option B is used with frames with standard or architectural top caps and connects an equal- or lower-height return frame to the top of an off-module upper tile in 1" intervals.

Use option B when:

- Architectural frame top caps are used.
- Return frame is the same height and the spine wall frame has an off-module tile with storage at the top. Specify off-module upper tile (FT188.) separately.
- Return frame is a lower change-of-height (COH). Specify off-module upper tile (FT188.) separately.

When using option B, top of off-module upper tile must match height of return frame.

Off-module return frame cannot attach within 2" of spine wall frame ends on frames with a base or open base with tapered foot, or 4" from the end of a frame with architectural foot.

Power/data cannot be routed from spine wall frame to off-module return frame.

Connector kit cannot be used for off module placement to a spine wall of a frame with any of the following products:

- Upmount screen (FT113.)
- Frame top screen (FT114.)
- Thin profile stacking window (FT187.)
- Pari screen, frame top (FT355.)

Product Information

Description

This tile attaches to 1 side of 2 adjacent frames to cover the lower zone and conceal the base, eliminating the need for a base cover on that side. It has a tackable fabric, laminate, or veneer surface with a horizontal bead along the top. The tile is UL listed and NFPA classified. Attachment hardware included.

Notes

Tile is designed to be used in the lowest position on frames with no base covers (FT110.xxxxX).

Specify width of tile to match the combined width of 2 frames.

Grain direction is horizontal for wood-grain laminates.

When specifying tackable fabric, horizontal option (R), fabric direction is horizontal (railroaded). Specify all tiles within the workstation the same.

Fabric-covered tile accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics.

Lower Power/Data Tile

FT171.
FT172.
FT17R.

Product Information

Description

This tile attaches to 1 side of a frame to provide access to power and data near the frame's base, just below the surface, or just above the surface. It has a painted or fabric surface and a horizontal bead along the top. The tile is UL listed and NFPA classified. Attachment hardware is included.

To cover the lower zone of a frame, specify 1 of the following:

- 30"-high lower power/data tile
- 19"-high lower tile (FT170.19) and 11"-high lower power/data tile
- 19"-high lower power/data tile and 11"-high lower tile (FT170.11)
- 19"-high lower power/data tile and 11"-high lower power/data tile

Cutout options have the following power and data cutouts:

- A: 2 power cutouts and 1 data cutout above the surface
- C: 2 power cutouts and 1 data cutout below the surface
- D: 2 power cutouts at bottom of tile

24"-wide tiles with cutouts for standard power (options A, C, and D) have 1 power cutout or 1 power cutout and 1 data cutout.

Notes

Specify width of tile to match width of frame.

To access power, order lower power/data tile power harness (FT152.) separately.

Tile with Power/data cutouts above work surface option (A) includes a communication faceplate extender and covers for the power/data openings.

35"-high frame cannot accept power/data tile in the top location.

When specifying fabric, horizontal tile (FT17R.), fabric direction is horizontal (railroaded). Specify all tiles within the workstation the same.

Fabric-covered tile accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics.

Rectangular Surface

FTE10.
FTS10.
FTT10.

Product Information

Description

This surface hangs from a frame, wall strips, or attaches to various support components to create a freestanding rectangular desk. It has a laminate top and thermoplastic edge, laminate top with a thermoplastic backed plywood edge, veneer top and edge, or painted top and edge. Laminate and veneer surfaces are 1 1/4" thick. Painted Formcoat® surfaces are 1" thick. When hanging from a frame or wall strips there is a 1" gap at the back of the surface for standard plug head and cord passage.

Notes

MicrobeCare™ is an antimicrobial coating applied to the laminate or veneer surface of this product.

MicrobeCare™ protects products from mold, mildew, algae, and bacteria that cause deterioration, discoloration, odors, and stains.

MicrobeCare™ is registered with the US Environmental Protection Agency (EPA).

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

For surface attachment bracket (D) option:

- Ganging brackets are included for using the surface as a bridge.
- Surface will only attach to front edge of squared-edge surfaces or the transition portion of the thin-edge or eased-edge surfaces.

For Canvas frame attached surface (F) option:

- Order appropriate supports separately; 2 supports are required for each surface (left and right side):
 - Open support, tapered foot, frame attached (FT294.)
 - Open support, architectural foot, frame attached (FT2A1.)
 - Support panel, tapered foot, frame attached (FT291.)
 - Universal post leg, frame attached (FT2B1.)
 - Surface cantilever (FT290.)
 - Surface support rail (FT295.)
 - Support pedestal
- Center supports are included for surfaces 54" wide and wider.

For no brackets, for freestanding or use with low credenza (S) option:

- Order the following support products separately:
 - Closed support leg (FV2E2.)
 - Open support leg, architectural foot (FV2A2.)
 - Square open support leg (FV2D2.)
 - Support leg, post (FV689.)
 - Universal post leg (FT2B2.)
 - Surface ganging bracket (FT29B.)
 - Surface support, low credenza, adjustable height (FT299.)
 - Surface support, low credenza, fixed height (FT298.)
 - Surface-attached pedestal
- When creating a freestanding desk with closed support leg (FV2E2.), a modesty panel (FV697.) is required for stability.

Thin-edge surfaces do not work with the following:

- Surface-attached pedestal
- Support pedestal
- Closed support leg (FV2E2.)
- Square open support leg (FV2D2.)

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever. See Canvas Office Landscape® Planning Guide for specific stiffener guidelines.

Product Information

Description

This wall-attached surface hangs perpendicular to a spine wall and is used in an About Face™ work surface orientation. It has a laminate top and thermoplastic edge, a veneer top and edge or a painted top and edge. Laminate and veneer surfaces are 1 1/4" thick. Painted Formcoat® surfaces are 1" thick. There is a 1" gap at the back of the surface for standard plug head and cord passage.

Notes

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

36" deep end must be on aisle side of workstation.

To support 36" deep end of surface on aisle side, order 1 of the following products separately:

- 36"-wide or wider frame with surface support rail (FT295.)
- 36"-deep open support, tapered foot, frame attached (FT294.36)
- 36"-deep open support, architectural foot, frame attached (FT2A1.36)
- Universal post leg, frame attached (FT2B1.)

To support 33 7/16" end of surface, order one of the following separately:

- Support rail (FT295.) Support rail must match width of attaching frame.

Center surface supports are included.

Eased-edge surface does not work with bookcase surface support (FT293.).

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever. See Canvas Office Landscape® Planning Guide for specific stiffener guidelines.

 - Open support, architectural foot, frame attached (FT2A1.)
 - Support panel, tapered foot, frame attached (FT291.)
 - Surface cantilever (FT290.)

• A corner support bracket is included.

For no brackets, for freestanding or use with low credenza (S) option:

- Surface must be connected to adjacent surfaces on both sides and surfaces must be the same depth.
- A back corner support and 2 end supports are required for each surface (left and right side):
 - To support the back corner of the surface, order one of the following separately:
 - Support leg, post (FV689.)
 - Universal post leg (FT2B2.)
 - To support the ends, order two of the following separately:
 - Closed support leg (FV2E2.), shared position
 - Square open support leg (FV2D2.), shared position

Product Information

Description

This 90° extended corner surface hangs from frames, wall strips, or attaches to support components and adjacent surfaces to create a freestanding extended corner desk. It has a left- or right-hand extension with a round end. It has a laminate top and thermoplastic edge, a veneer top and edge, or a painted top and edge. Laminate and veneer surfaces are 1¼" thick. Painted Formcoat® surfaces are 1" thick. When hanging from frames or wall strips there is a 1" gap at the back of the surface for standard plug head and cord passage.

Notes

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

Surface requires support at both ends of the surface.

For Canvas frame attached surface (F) option:

- 2 supports are required for each surface (left and right side).
- To support the extended end of the surface when frame attached, specify frame width combination 12" shorter than width of surface and order one of the following separately:
 - Open support, tapered foot, frame attached (FT294.)
 - Open support, architectural foot, frame attached (FT2A1.)
 - Support panel, tapered foot, frame attached (FT291.)
- To support the extended end of the surface when used as a peninsula, order one of the following separately:
 - Open support leg, tapered foot, peninsula/d-shaped surface attached (FT2F2.), square edge only
 - Open support leg, architectural foot, peninsula/d-shaped surface attached (FT2A2.A) inset leg position.
 - Square open support leg, peninsula attached (FV2D1.)
 - Support leg, post (FV689.)
 - Universal support leg, post (FT2B2.)

For Canvas frame attached surface (F) option:

- To support the short end of the surface, order one of the following separately:
 - Surface cantilever (FT290.)
 - Open support, tapered foot, frame attached (FT294.)
 - Open support, architectural foot, frame attached (FT2A1.)
 - Support panel, tapered foot, frame attached (FT291.)
- A corner support bracket and center support for the extended side of the surface are included.

For no brackets, for freestanding or use with low credenza (S) option:

- Surface must be connected to adjacent surface on the short end and adjacent surface must be the same depth.
- A back corner support and 2 end supports are required for each surface (left and right side).

For no brackets, for freestanding or use with low credenza (S) option:

- To support the back corner of the surface, order one of the following separately:
 - Support leg, post (FV689.)
 - Universal post leg (FT2B2.)
- To support the extended end of the surface, order one of the following separately:
 - Open support leg, tapered foot, peninsula/D-shaped surface attached (FT2F2.), square edge only
 - Open support leg, architectural foot, peninsula/D-shaped surface attached (FT2A2.)
 - Square open support leg, peninsula attached (FV2D1.)
 - Support leg, post (FV689.)
 - Universal post leg (FT2B2.)
- To support the short end of the surface, order one of the following separately:
 - Closed support leg (FV2E2.), shared position
 - Open support leg, architectural foot (FV2A2.), shared position
 - Square open support leg (FV2D2.), shared position

Surface must be connected to adjacent surface on short end and adjacent surface must be the same depth.

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever. See Canvas Office Landscape® Planning Guide for specific stiffener guidelines.

Product Information

Description

This peninsula surface attaches to a frame, wall strips, or is supported by various support components to create a freestanding desk. It abuts an eased-edge rectangular surface on the users left side creating an L-shaped configuration. Eased-edge surfaces have a painted top and edge. Laminate and veneer surfaces are 1 1/4" thick. Painted Formcoat® surfaces are 1" thick. When hanging from a frame or wall strips there is a 1" gap at the back of the surface for standard plug head and cord passage.

Notes

For additional product options, see Vary Easy Program in Appendices.

Peninsula surface requires support on both ends of the surface.

To support the peninsula end of the surface, order 1 of the following supports separately:

- Open support leg, architectural foot, peninsula/d-shaped surface attached (FT2A2.A), inset leg position
- Square open support leg, peninsula attached (FV2D1.)
- Support leg, post (FV689.)
- Universal support leg, post (FT2B2.)

For Canvas frame attached surface (F) option:

- Attachment hardware is included.
- When attaching surface to a frame, match depth of surface to width of frame.

For no brackets, for freestanding or use with low credenza (S) option:

Order the following support products separately:

- Closed support leg (FV2E2.), eased edge only
- Open support leg, architectural foot, peninsula/d-shaped surface attached (FT2A2.B)
- Square open support leg (FV2D2.), eased edge only
- Support leg, post (FV689.)
- Universal post leg (FT2B2.)

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever. See Canvas Office Landscape® Planning Guide for specific stiffener guidelines.

Work surface-attached screens and modesty panels do not work with this peninsula surface.

The open shelf organizer (FF900.) does not work with an eased-edge peninsula surface.

Product Information

Description

This surface attaches to the ends of 2 surfaces separated by a frame. It has a laminate top and thermoplastic edge, a veneer top and edge, or a painted top and edge. Laminate and veneer surfaces are 1 1/4" thick. Painted Formcoat® surfaces are 1" thick. The surface cannot stand alone. Brackets are included for attaching the d-shaped surface to adjacent surfaces.

Notes

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

51"-wide d-shaped surface attaches to 24"-deep surfaces at the end of a frame. 63"-deep d-shaped surface attaches to 30"-deep surfaces at the end of a frame. The surface is notched to allow a flush fit against the finished end.

To support the end of the surface, order 1 of the following supports separately:

- Open support leg, tapered foot, peninsula/d-shaped surface attached (FT2F2.)
- Open support leg, architectural foot, peninsula/d-shaped surface attached (FT2A2.)

Or order 2 of the following supports separately:

- Support leg, post (FV689.)
- Universal support leg, post (FT2B2.)

Product Information

Description

This curved-front storage unit hangs from the following products: Action Office® Series 1 or Series 2 panel or wall strips; Canvas wall-based frame or wall strips; or Ethospace® on- or off-module frame, off-module upper tile, or wall strips. It combines a flipper door and a 13¾"-deep shelf to enclose binders, files, and other items. The unit has a painted door that opens over the case and 2 door mechanisms: a standard mechanism or a lift-assisted mechanism. A lift handle can be specified to enable easier lifting and closing of the flipper door. The underside of the shelf accepts a task light.

Attachment hardware is included. Shipped knocked down.

Storage units can hang from 2 panels or 2 frames with a combined width of 36", 42", or 48". The 36", 42", and 48"-wide units can also span more than 1 Ethospace off-module upper tile.

Metallic silver (MS) case has cool grey neutral (CL) end panels and lift handle. Metallic champagne (CN) and metallic bronze (EH) cases have warm grey neutral (WN) end panels and lift handle.

Notes

Lift handle conforms to guidelines of Americans with Disabilities Act (ADA). Ethospace off-module upper tile location determines placement of storage unit.

Use component brace for C-/E-style flipper unit/shelf (X3910.1) to connect overhead storage units in heavy component loading situations.

Order under shelf LED task light (G6170.xxQ) separately. Width of light must match width of flipper door unit.

Order optional angled shelf divider (G7330.) separately.

To enclose back of unit, order C-style flipper door back panel (X3790.) separately.

For keyed-alike locks, order lock plugs separately. See Keyed-Alike Information in Appendices.

Cabinets up to 60" wide have 1 primary and 1 secondary door. 66"-wide cabinet has 2 primary doors and 1 secondary door. 72"-wide cabinet has 2 primary and 2 secondary doors.

Cabinets up to 60" wide have a center divider. 66"-wide cabinet has 2 dividers and is divided as $\frac{1}{3}$, $\frac{1}{3}$, $\frac{1}{3}$. 72"-wide cabinet has 2 dividers and is divided as $\frac{1}{4}$, $\frac{1}{2}$, $\frac{1}{4}$.

Product Information

Description

When used with a Canvas Private Office setting, this fabric back panel can mount to a wall above a desk or credenza worksurface (at 28½" high) or low credenza with or without the presence of overhead storage. Standard heights provided within FV930 are designed to utilize storage with a 2¼" plinth base (with a ⅜" thin or 1¼" thick top) at a 68"-high Canvas datum. Wire management included.

Notes

Patterned fabrics will not be pattern-matched when 2 fabric back panels are placed side-by-side.

Use our Made-to-Measure+ tool to specify fabric back panels in additional sizes when using Canvas 4" foot (in lieu of 2¼" plinth base), pairing with Canvas product with Tu® Wood Casegoods, or making use of 79"-high datums.

Fabric back panel accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics. COM yardage requirements for both FV930 and FV930V are as follows:

Product Information

Description

When used with a Canvas Private Office setting, this laminate back panel can mount to a wall above a desk or credenza worksurface (at 28½" high) or low credenza with or without the presence of overhead storage. Standard heights provided within FV940 are designed to utilize storage with a 2¼" plinth base (with a ⅜" thin or 1¼" thick top) at a 68"-high Canvas datum. Wire management included.

Notes

Patterned or wood-grain laminates will not be pattern-matched or grain-matched when 2 laminate back panels are placed side-by-side.
Use our Made-to-Measure+ tool to specify laminate back panels in additional sizes when using Canvas 4" foot (in lieu of 2¼" plinth base), pairing with Canvas product with Tu® Wood Casegoods, or making use of 79"-high datums.
For exact dimensions and application assistance, see Canvas Office Landscape® Private Office Enhancements Planning Guide.

Wall-Mount Fabric Tackboard, for use with Canvas Private Office FV990.

Product Information

Description

When used with a Canvas Private Office setting, this fabric tackboard can mount to a wall above a desk or credenza worksurface (at 28½" high) or low credenza with or without the presence of overhead storage. Standard heights provided within FV990 are designed to utilize storage with a 2¼" plinth base (with a ⅜" thin or 1¼" thick top) at a 68"-high Canvas datum. This product can also be used as a stand-alone product on an architectural wall.

Notes

This tackboard does not facilitate wire/cord drop. If wire management is desired, order fabric back panel (FV930, FV930V, or FV932). Patterned fabrics will not be pattern-matched when 2 tackboards are placed side-by-side. For additional sizes and custom needs, use our Made-to-Measure+ tool to customize dimensions to tenth-of-an-inch precision within 8-48"H×96"W or 8-96"H×48"W size capabilities using Exact Size Wall-Mount Fabric Tackboard (FV990V).

Tackboard accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics. COM yardage requirements for both FV990 and FV990V are as follows:

Product Information

Description

This tackable fabric screen attaches to a work surface at the right or left edge to provide division and boundary between workers. It attaches with no interference from supports below the work surface. Attachment hardware included.

Notes

Screen height is 13½" or 17½" above work surface, aligning with bead heights of 41" and 45".

Screen width matches work surface depths that have a 1" gap at the back edge.

2 attachment methods ship with the end-of-run right handed (CR) and end-of-run left handed (CL) screen. The screen can be installed using the bracket, or using threaded screws that drill bayonets directly into the surface.

See planning guide for exact location of holes.

End-of-run screen does not work on Canvas Beam.

See planning guide for applications and other compatible product lines.

Screen accepts Customer's Own Material (COM). Yardage is estimated for nondirectional 54"-wide fabrics.

For vertical fabric direction (T):

Height—Yardage

42—1.19

46—1.45

For horizontal fabric direction (R):

Width—Yardage

24—0.90

30—1.10

36—1.30

For information on multiple quantities or directional fabrics, contact COM Department. See Order Information in Appendices.

Vary Easy Program

GSA

Program Overview

The Vary Easy program offers expanded product selections beyond what is available through our standard offering. From expanded material and finish lists, to size availability, to completely new product configurations, the Vary Easy program offers it all at standard pricing, warranty, and lead-time.

Specifying Vary Easy using Made-to-Measure Plus

Vary Easy products are now available by clicking the Vary Easy/Options tile in the Made-to-Measure Plus tool.

Made-to-Measure Plus is a web-based tool available through Omni that takes the guesswork out of specifying products and service parts. It's quickly evolving to become your one-stop shop for specifying Herman Miller products and service parts, particularly customized product like Vary Easy and HM Options.

Vary Easy products are no longer published in marketing SIF for importing into specIT and other third-party specifiers. Specifying through the Made-to-Measure Plus tool allows us to make frequent updates and offer more complex products. It allows you to easily specify and price products and download SIF files to import into your specification tool. The acknowledgement process for Vary Easy products is the same as for any standard order. Vary Easy products ship with a standardized lead-time and are competitively priced.

For step-by-step instructions, reference the Made-to-Measure Plus page under Tools & Resources on Omni to watch the how-to video and to see how easy it is to specify Vary Easy products in Made-to-Measure Plus.

For Vary Easy product and specification questions, contact Product Services at 866 854 3048 (ext #1).

For technical questions about the Made-to-Measure Plus tool, contact Sales Technology Support at 866 854 3048 (ext #4) or sts@hermanmiller.com.

Stain-to-Match Program

GSA

Stain-to-Match Program

Program Overview

The Stain-to-Match program gives you the option of using veneer finishes that are not listed in the standard offering. The program allows Herman Miller to match a customer's existing recut or natural veneer, or create a new finish that is unique to an installation.

Specific information on approval, ordering, pricing, and warranty for the Stain-to-Match program is listed below. Questions and requests for assistance may be directed to Herman Miller Options at:
(800) 654 3910

Ordering Products with Stain-to-Match Veneers

1. Fill out the Options Stain-to-Match Request Form and send along with a color sample (2" x 3" minimum) to the Herman Miller Options Applications Team at the address provided on the form. The form can be found on Omni.
2. Within 7-10 working days, Herman Miller Options will send a sample of the color-matched stain on Herman Miller veneer to the requester for the customer's signed approval.
3. If the sample meets the customer's approval, sign the reverse side of the sample, scan and email the approval to:
options@hermanmiller.com.
4. After the stain has been approved, a formal quotation with special number and pricing can be provided, or the product can be specified through the Vary Easy program, if available. Work with the Options team on final product needs and how to specify.
5. A purchase order can then be placed.

Stain-to-Match Warranty
