# Introduction

## A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

### Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

### Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

For more information about our products and services or to see a list of dealers, visit [www.HermanMiller.com](http://www.HermanMiller.com).

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest  $\frac{1}{8}$ ". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Say® Work Stools

**Product Information**

**Description**

This fully-assembled work stool has a frameless 3D Intelligent® Suspension back and a Stretch knit back cover that allow freedom of movement while providing targeted back support and moving heat away from the body. The suspension is supported by a Y-Tower®. The knit back cover provides a soft layer and has a knit-to-fit construction with elastomeric yarns that allows it to flex as the user moves. The synchronous tilt provides continuous balance and lets the body recline naturally, pivoting at the ankles, knees, and hips.

The chair has a 5-star base.

Tilt options include a tilt limiter and tilt limiter with seat angle. The tilt limiter allows the user to limit the amount of recline and set the back into an upright position. The tilt limiter with seat angle allows the user to set the tilt range and select a 5° forward seat angle.

The stool has an upholstered seat. Seat options include a fixed 16" seat depth, or a height-adjustable seat depth that allows the user to adjust the depth from 16" to 18".

Back-support options include a standard option with no additional support, and an adjustable lumbar support option. The standard option has passive PostureFit® back support molded directly into the strands of the suspension material, providing targeted support at the base of the back, below the beltline, that helps achieve healthier posture and improved lower back comfort. The adjustable lumbar support option adds a user-adjustable lumbar that adjusts 4" in height.

Arm choices include a no arm option; a fixed, non-adjustable option, a height adjustable option that allows the arms to move 4" vertically; and a fully adjustable option that allows the arms to move 4" vertically, 1 3/8" horizontally, 2" front-to-back, with armpads that pivot 11° inward and 11° outward.

**Notes**

Footrest available in trivalent chrome; column and ring support are black.

Footrest diameter is 20".

Arm and tilt cover finish matches specified Y-Tower finish.

Arms and Stretch knit back cover can be removed in the field with no tools required.

For information on casters and glides, see Casters and Glides in Appendices.

Customer's Own Material (COM) on the seat requires 3/4 yard. Customer's Own Leather (COL) on the seat requires 8 square feet. See Order information in Appendices.

### Supplier Connection

#### Program Overview

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from Maharam, Camira, C.F. Stinson, Guilford of Maine, Luna Textiles, Momentum Textiles and Ultrafabrics. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:

(616) 654 3400
