Co/Struc® Lab Work Tables
LAB WORK TABLES

Today, it’s one set of needs. Tomorrow, another. But no matter how much things may change, you need a workspace that’s designed around you.

Our new family of lab tables offers a flexible and adaptable solution. Choose from a range of heights, surface materials, storage options, and technology supports to accommodate a wide and evolving variety of people, processes, and heavy lab equipment. Start with a seated, standing, or adjustable-height base designed for a range of administrative or lab-specific functions. Then match it with a Corian®, phenolic resin, high-pressure laminate, or Chemsurf® surface, all sold separately.

A flexible design lets you add stretchers to accommodate future storage needs, integrate with Co/Struct C frames or drawers, or enhance the health of your team by adding keyboard trays and adjustable monitor supports. Glides or casters make it easy to rearrange tables at any time, and our 12-year parts and labor warranty ensures that your lab tables will support your needs for years to come.
Basic Lab Work Table
Hardworking. Healthcare Appropriate.

Base Dimensions
W: 48” (accommodates 48 – 60” W work surfaces)
