Cosm™

Instant comfort—anywhere

**Cosm Chair by Herman Miller™**  
Designed by Studio 7.5

Sit in Cosm, and you just might forget you're sitting in a chair at all. Its sophisticated ergonomic design sets a new bar for instant, personalized comfort, no matter who sat in the chair before you, how long you'll be in it, or what you'll be doing. The designers at Berlin-based Studio 7.5 knew, even when working on predecessors like Mirra, Setu, and Mirra 2, that the ideal chair would provide a smooth feeling of natural balance.

Cosm's revolutionary Auto-Harmonic Tilt does just that—putting the person first and responding to them, no matter their posture—for total support. Available in three different back heights, as well as a stool, Cosm gives you a new experience of comfort—anywhere you work.

## Performance

A tilt is to a chair what a transmission is to a car, and like transmissions, some are manual, and others, such as Cosm's, are automatic. With other self-adjusting models, the chair forces the body to conform to the tilt's movement. Cosm's Auto-Harmonic Tilt puts the person first and responds to them—no matter their posture—providing a balanced recline and personalized comfort. Studio 7.5 and Herman Miller perfected the self-adjusting tilt by inventing and engineering a complex, finely tuned mechanism. Accounting for the sitter's vertical force, the gears within the tilt move the fulcrum along a leaf spring to automatically adjust the tilt's tension.

The continuous contour of the chair's Intercept Suspension envelops each person's individual form, delivering dynamic, uninterrupted support. It clips into the thin but strong frame, which feels nearly non-existent and offers support while flexing so you can comfortably move your upper body.

"You should have a chair that allows you to change postures as easily as possible," the designers say. "You can only do that with a chair that is correctly adjusted, so we wanted to build a chair that does that part for you."

Cosm's innovative new Leaf Arms—the first of their kind—feature a soft but firm cradle design that provides a large, cozy resting place for your elbows. The arm rests make holding a phone or book natural and comfortable, and the angle of the arms mean they don't get in the way of a work surface when it's time to get back online.

## Design

The German word for design is *entwerfen*, which roughly translates as “to throw.” According to the designers, that’s “throw something a little bit ahead of the curve, or ahead of what you know, to help pull you in the right direction.” With Cosm, “throwing” led Studio 7.5 to their most sophisticated design yet.

### About Studio 7.5

When Burkhard Schmitz and Carola Zwick started their design studio as a team of six in 1992, they were looking for the freedom to work on projects that interested them. And for the freedom from bosses and titles. “Everybody does everything,” says Schmitz, speaking for the group that now includes Carola’s brother, Roland Zwick. “That’s how we cultivate ideas and maintain our openness and curiosity.”

They find designing office chairs to be most rewarding and have worked with Herman Miller on the Setu Chair, the award-winning Mirra chair, Mirra 2, and Cosm. “We define not only how the chair looks but how it performs,” Carola says. As to how Setu, Mirra, and Cosm all perform for you, they provide comfort no matter how or where you sit.

## Materials

Cosm is available in one hue from top to bottom to further cement the unity of the design and the sculptural quality of the chair. Or, mix and match any of the six colors on the suspension and frame.

**Family**  
Work Chair  
Stool

The following information applies only to Cosm work chairs.

**Overview**

Maximum User Weight 159 kg  
Population Range 5<sup>th</sup>–95<sup>th</sup> Percentile

**Seat Height**

Chairs 417–531mm\*  
Stool 580–826mm\*

\*range may vary depending on cylinder height

**Tilt**  
Auto-Harmonic Tilt

**Back Options**

Low-Back  
Mid-Back  
High-Back

**Arm Options**

No Arms  
Fixed Arms  
Height-Adjustable Arms  
Leaf Arms
