Canvas Metal Desk

Workstations made for government,
healthcare, and education

Canvas Metal Desk

Canvas Metal Desk delivers a durable design that works both in an open plan or a private office. It leverages a common kit of parts, so you can mix and match the desk with various pieces from our larger Canvas Office Landscape® offering.

This gives a government office, healthcare facility, or educational setting the opportunity to adapt as the needs of the organization and the people within it change.

Stands the Test of Time

Canvas Metal Desk is constructed with steel, so it's designed to withstand intense use from industries that put pressure on their furniture. It also exceeds the rigid quality and testing standards of both BIFMA and GSA.

Interchangeable

Canvas Office Landscape is designed to be adaptive. At its core is a kit of parts that combines interchangeably, giving organizations a powerful tool to make changes in the workplace. Canvas Metal Desk's place within this full Canvas family allows you to future-proof your space without sacrificing cohesion. It pairs easily with products like Canvas Wall, which creates privacy in an open plan, or Canvas Private Office, for activities that require confidentiality.

Canvas Metal Desk works just as well in an open-plan workplace as it does a private office, making it an ideal workstation for collaboration or privacy.

The Canvas Metal Desk offering is compatible with Motia Sit-to-Stand Tables, allowing people to elevate their work experience.

Quality of Design

Clean lines and a unified aesthetic were key when we designed Canvas Metal Desk, so we chose materials that maintain the highest Herman Miller standards. With an eye to detail, every part and piece comes together smoothly, making this a visually appealing, functional addition to the workplace.
