

HermanMiller  
Civic™ Tables

## A universal table collection

### **Civic Tables**

Designed by Sam Hecht and Kim Colin

Civic is a comprehensive table collection that lends itself to a wide variety of applications for work, home, and hospitality. The collection includes meeting, conference, café, lounge, and side tables, as well as tables for collaboration, each available in a variety of shapes, colours, materials, and finishes.

## **Expressive materials**

The design of Civic Tables allows for unique expression and diversity of style while maintaining visual harmony across a space. Civic comes in a breadth of materials and finishes, including marble, and soft-touch surfaces, providing many avenues for brand expression. When paired with a slim profile edge, premium finishes turn tables into showpieces.

## **Convenient connectivity**

Civic Tables feature table-top access to power, so connection is always within reach. Cables and cords are neatly concealed within the columns and beams. The combination of a clean, calm aesthetic and convenient power enhances focus and supports the way people work today.

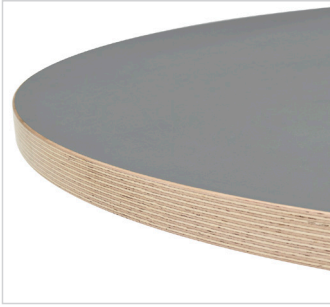

## **Modest to mighty**

The Civic Table family includes tables of varied sizes and shapes—rectangular, square, round, oval, teardrop and trapezoid—with options for finishes that range from practical to cultured. Whether you need a table with gravitas for a boardroom or a table with charm for a café, it's all in the family.

Marble surface with a slim profile edge for a premium finish.

## Details and features

Square edge

Profile edge

Castor and glide options

Table top shapes for any environment

Easy access power options

A range of heights, including standing height

## About Sam Hecht and Kim Colin

Designers Sam Hecht and Kim Colin of London-based Industrial Facility create work that balances the need to live a full life with the desire to keep things simple. British-born Hecht's contemplative approach and attention to detail complements California-born Colin's architectural sensibility; together they design furniture and products that relate to the landscapes where they are used.

Colin says, "We strive for simplicity of use that is not to the detriment of good functionality." Hecht adds, "What comes out of it is a kind of equilibrium where products are relevant and lasting."
