

Layout Studio[®]

Flexible benching that adapts
to the needs of any organisation
and its people

Layout Studio

Finding a work base in Layout Studio is easy for anyone. It integrates with personalised work tools and storage and can take many forms across the office landscape. Layout Studio's options play well with organisations, too. It lets them scale up or down as needed, and accommodate local preferences within a global system.

About the person

Layout Studio lets people edit their space in a personal way. Choices for storage and multifunctional work tools allow the individual to fine-tune and adjust each work area as needed. The organisation achieves spatial efficiency, and the person maintains a sense of autonomy.

Across the landscape

With an extensive vocabulary, including standing-height tables, Layout Studio applies in settings across the office landscape, from individual workspaces to benching to private offices and project team tables. Its vast range of choices and ability to scale up or down means that Layout Studio can be responsive to the needs of individuals and teams and change as those needs evolve.

Around the world

Working styles across the world fully informed the design of Layout Studio. Starting with a universal foundation, the system incorporates subtle changes that make sense for different cultures and countries. The outcome is consistent form and function that translate across the globe.

Into the future

Choices and scalability ensure Layout Studio can change with the needs of an organisation and its people. As teams grow and condense, as personal preferences shift, organisations can respond – well into the future – by scaling the system up or down, or changing how it's arranged.

Details and features

Access Flap

Umbilical Riser

Streamline Leg

Understructure and Cable Tray

Bound Screens

Aero Leg

Axis Leg

Aero-Timber Leg
