

HermanMiller Layout Workwall

Enrich your environment

Layout Workwall

As part of the Layout family, Workwall benefits from our wealth of knowledge and skill in producing systems furniture which started with the revolutionary Action Office system in 1968. Use Workwall to create welcoming private offices with storage and display space which complement the desking.

Used in meeting rooms, Workwall can include integrated technology to support presentations and collaboration. In open plan settings, Workwall can be used as a way of integrating additional storage space into the landscape.

Proudly on Display

Workwall transforms simple spaces into warm and welcoming private offices, practical meeting rooms or cosy havens. Use Workwall's open shelves, or flat surfaces, to display reference material, team achievements or decorative items.

Workwall's unique wall-mounted system also supports integrated power and technology allowing people to share digital content or connect with remote participants.

Part of the Family

The shared design with the rest of the Layout family enables Workwall to work in harmony with Layout Studio desks and meeting tables. A united aesthetic across the entire Layout family ensures Workwall enhances settings across the office landscape.

Hidden from View

Use free-standing Workwall credenzas and wall hanging cupboards to keep things in order in meeting rooms, or to enable easy access to less frequently used reference items. Credenzas can be both integrated onto the Workwall or Layout Studio workstations. Their surfaces also offer an elegant place to display items and enhance a setting.

During closed-loop recycling wood waste is sent for reprocessing. The clean recycled wood is then used as part of the mix to make new particle board, which is then used to make more furniture, including Layout Workwall.

With a flexible range of materials and colour options, Workwall can be shaped to suit your needs, whether you choose a deep Walnut shade for a traditional and formal space, or a light and soft colour palette for more informal settings.
