

Wishbone family

Designed by Colebrook Bosson Saunders for Herman Miller

Wishbone family

Setting the
standard for
multi-screen
ergonomics
since 1999

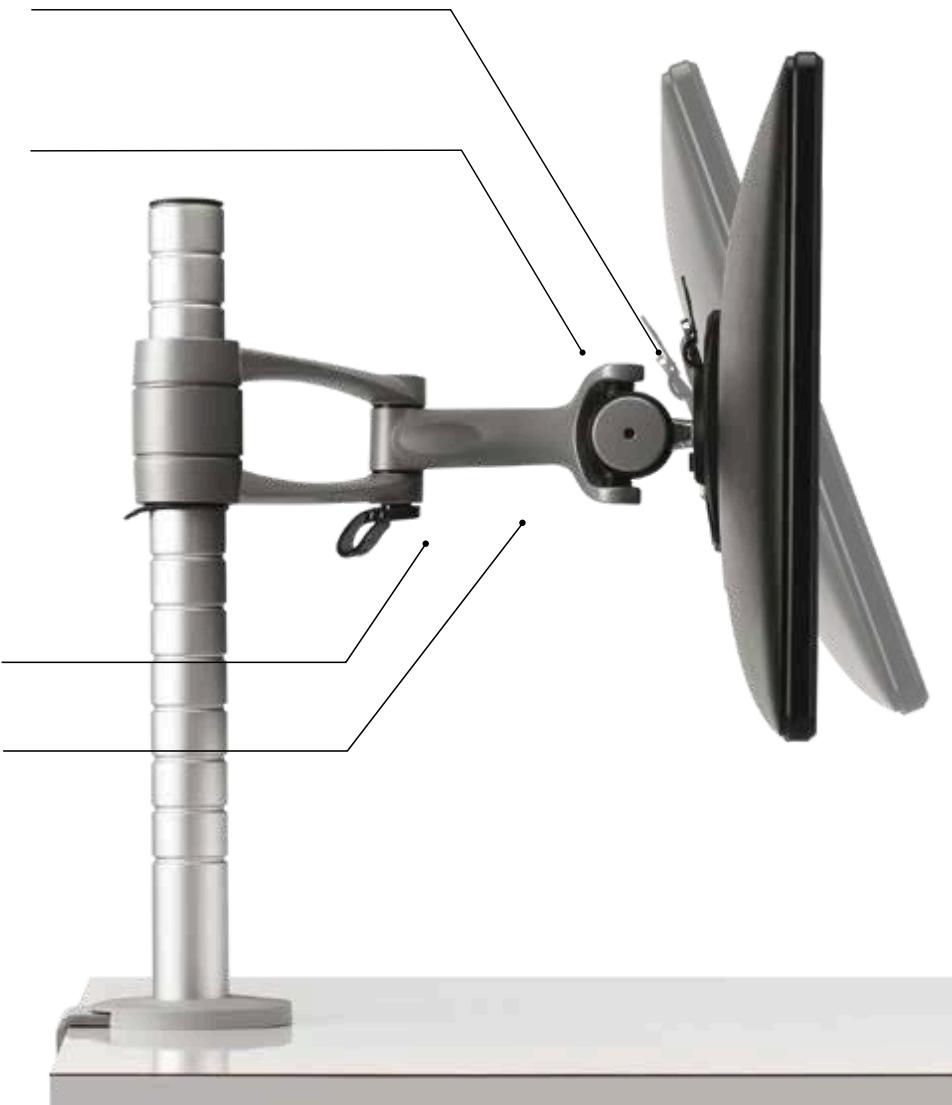

Wishbone was the original flat screen monitor arm that broke the mould, redefining how information is displayed in the workplace. Its iconic design meets all multi-screen requirements and has earned numerous international design and innovation awards worldwide.

With minimal effort and no impact on stability, the screen easily rotates between portrait and landscape orientations.

The quick-release mechanism and $\pm 50^\circ$ tilt ensure exceptional screen stability in both portrait and landscape orientations, preventing unwanted movement while allowing smooth tilt up and down and 90° rotation left and right.

An integrated cable management system that keeps the workstation neat, organized, and clutter-free.

Three lengths available.

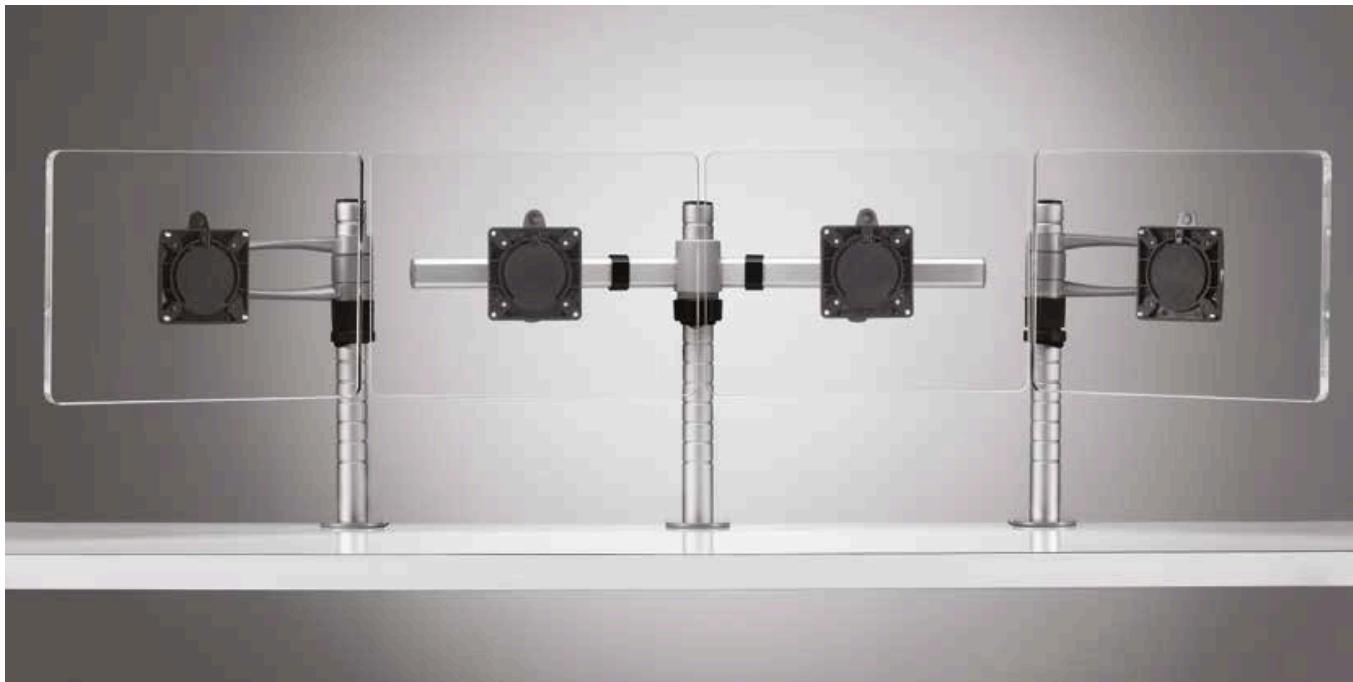

Wishbone Dual Bar

Performance

Built to evolve with changing work demands, the Wishbone range is reliable, modular, and easy to install. Trusted across trading floors, financial institutions, control rooms, and multimedia environments, it adapts effortlessly to complex setups and remains one of the best-selling monitor arms in the world.

Wishbone

Available in three lengths, Wishbone provides a flexible range of options. It can be installed at a range of heights and configurations to create the ideal set-up according to specification.

Wishbone Dual Mount Bracket

For a flexible dual screen solution that enables the user to adjust the workstation according to work dependency and application type. One display can be moved into a more prominent position for primary dependency with the other screen supporting, or both screens can display information equally.

Wishbone Dual Bar

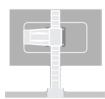

Perfect for holding two screens of equal size and dependency in position.

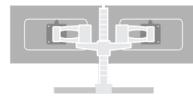

Wishbone Plus

Can support monitors up to a weight range of 24kg ensuring it can comfortably hold the heaviest displays on the commercial market.

Configurations

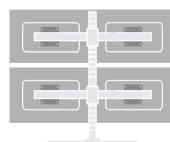

Single screen

Two screens

Three screens

Four screens

Key Features Wishbone family

- Highly adaptable, fully articulated design for flexible multi-screen positioning.
- Ergonomic manual height adjustment with easy portrait-to-landscape rotation.
- Tool-less, easy to install and retrofittable across workstations.
- Fine height adjustment for accurate multi-screen alignment (Wishbone Plus and Dual Post Mount).
- Durable construction with a 12-year lifetime warranty, available in three lengths.
- Integrated cable management and 99% recyclable materials.
