Exemplifying the designers’ mantra of “the best for the most for the least,” Charles and Ray Eames’ molded plastic side chair is as stylish today as it was when first available in 1950. The barely-there yet infinitely stable 4-leg base complements the sleek lines and built-in comfort of the body-cradling shell.
The organic shape and sophisticated lines of Charles and Ray Eames’ molded plastic side chair make it a desirable design object as well as a surprisingly comfortable seating addition to any environment. This version features a wire (often called the “Eiffel Tower”) base that is both light and strong.
In this expression of the Charles and Ray Eames single-form Molded Plastic chair, a solid maple wood dowel base offers a warm counterpoint to the 100 percent recyclable polypropylene shell material.

Eames® Molded Plastic Side Chair Stacking / Ganging Base

Designer
Charles and Ray Eames

Original Production Date
1950

Warranty
5 years

The Eames molded plastic side chair exemplifies the designers’ mantra of “the best for the most for the least,” offering both style and comfort in its efficient, organic form. A trivalent chrome stacking base adds functionality, with ganging capability so you to connect several chairs in a straight line.

Eames® Molded Plastic Armchair 4-Leg Base

Designer
Charles and Ray Eames

Original Production Date
1950

Warranty
5 years

The sleek lines and organic shape of this enduring chair by Charles and Ray Eames epitomize their mantra of “the best for the most for the least.” The quiet, minimal 4-leg base complements the gentle curves of the molded shell, with its deep-seat pocket and waterfall edges.
Herman Miller Collection
Eames® Molded Plastic Armchair Wire Base

Designer
Charles and Ray Eames

Original Production Date
1950

Warranty
5 years

Comfortable and lightweight, and updated with modern materials, the clean, simple form of Charles and Ray Eames’ original 1948 design cradles the body and complements any setting. This version features a welded wire base (often called the “Eiffel Tower” base), that is both light and strong.
This enduring chair, originally designed in 1948 by Charles and Ray Eames, epitomizes the designers’ mantra of “the best for the most for the least.” Updated with modern materials, the molded shell in recyclable polypropylene provides an interesting visual contrast to the solid maple wood dowel base.
