

# HermanMiller Wishbone® Plus Monitor Arm

## Designer

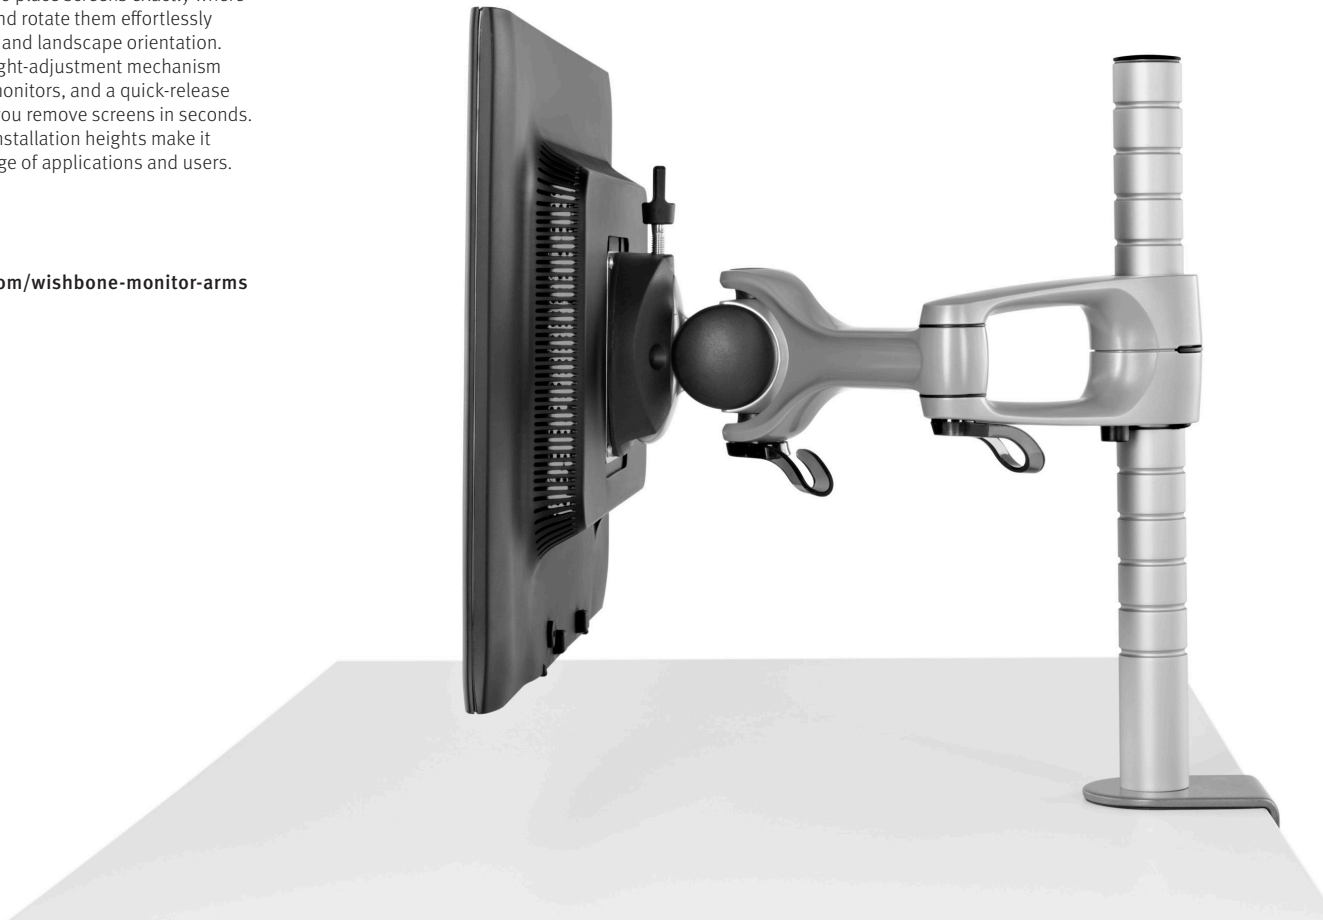

Colebrook Bosson Saunders

A heavy-duty version of the original Wishbone, Wishbone Plus can accommodate as many as four screens weighing up to 52 pounds each, on a single post. Wishbone Plus enables you to position your technology at the proper distance to ease neck and eye strain, using precise controls to place screens exactly where you need them and rotate them effortlessly between portrait and landscape orientation. A built-in fine height-adjustment mechanism aligns adjacent monitors, and a quick-release attachment lets you remove screens in seconds. A wide range of installation heights make it suitable for a range of applications and users.

## Warranty

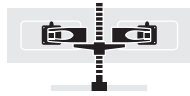

12-year, 3-shift
