

HermanMiller Healthcare
Procedure/Supply Carts

**Guaranteed: 87,600 hours of constant use...
and then some.**

The healthcare environment is demanding and constantly changing. Our tough, durable carts are designed to meet the demands you have today and make it easy to change when your needs do. A modular cart system means universal sizes and easily interchangeable drawers and accessories.

Beyond the specific procedures that carts and components address, the variety of procedure/supply carts gives you options to match the capacity, supply, and work flow that make the most sense for your care and delivery processes.

We also offer a cart that gives you access to drawers and contents from front or back.

Security matters when it comes to cart contents. Our lock options offer you assurance that supplies are intact. Procedure/supply carts are available with keyless or keyed entry, tamper indicators, wall locks, and lockable doors. Carts with lock bars lock automatically when closed. Keyless options include an alarm that sounds if the lock bar isn't shut completely.

Our flexible solution expands your storage and transport capabilities, saves you time and money, and improves efficiency.

HermanMiller Healthcare

Organised for mobility

Don't let cart design slow down your work. Our drawer organiser system lets you remove the individual bins and supplies you need and take them to where you are working.

Patient focused

Efficiently move patient-specific supplies from pharmacy or central supply areas to patient floors and rooms.

The right combinations

Combine drawers and shelves in a number of ways to efficiently organise large and small supplies. An extra-wide cast cart services emergency departments with room for orthopedic supplies.

Comforting colours

Welcome patients and families into comfortable and residential feeling environments. Our cart palette gives you many colours from which to choose.

HermanMiller Healthcare

Storage and retrieval space

Extra-wide carts offer plenty of open space for storage and retrieval of large instruments or supplies or interior configurations that combine drawers and shelves for smaller items.

Door and interior options

When security isn't an issue, curtain doors will keep supplies clean without adding weight. Wire and solid shelves provide options as does our variety of drawer, shelf, and organiser components.

Information access

An elevated defibrillator platform pivots to give you 360-degree visual access to the display. The raised platform keeps the defibrillator clear, frees up cart surface, and doesn't block access to drawer contents.

Delivering medication

Transport carts should improve on your system of supply organisation and delivery. Our extra-wide cart is a mini-pharmacy on wheels. Medications can be delivered to specific floors or departments for stocking medication carts. A number of lock options keeps medications secure.

Smart design

Raised edges on the surface, a keyboard shelf, front access door, and ventilated CPU storage are included. The monitor support includes a height- and angle-adjustable monitor arm and platform.

Added security

Carts can be specified with lockable doors for areas where contamination or added security is a factor. Clear doors provide an option for quickly identifying contents.

Plenty of room

Each catheter rack slide includes prongs, side label clips, and front label holders. An extrawide cart provides room for both catheter racks and supply storage.

Caregiver focused

Additional overhead storage speeds up workflow by placing supplies at eye level, where they are readily available.
