

Shift Levels™ Tables

To shift' means 'to move or cause to move from one place to another.' The Shift Levels Height Adjustable table was designed for exactly this: it was driven by the need in contemporary organisations for furniture that can move between functions, and fast.

With uninhibited, unhindered connection comes spontaneity and bright ideas. Shift was built with just this in mind: its distinctive shape makes connections of all kinds possible.

Benefits

- Inspired by the contours of the guitar pick and tear drop shaped, Shift's Levels curving form supports clear lines of sight in all directions – at colleagues or clients in the room or on the screen.
- Moving from sit to stand with ease, Shift supports spine health while facilitating brainstorming and ideation. After all, the best ideas often come when we can move and express ourselves freely.
- To support optimal performance in the modern office, everything from solo computer work to group presentations needs ready access to power. Shift caters to this via its ingenious, Atlas-inspired built-in cable management system.

Warranty

12-year, 3-shift
