

Co/Struc[®] System

The original movable, modular system for healthcare applications, Co/Struc efficiently handles the constant change inherent in healthcare. It has easy-to-clean surfaces and components and parts that can be switched out quickly, without the disruption of construction. Its integrated design provides aesthetic and functional consistency across patient care areas, pharmacies, caregiver work areas, and labs.

Designers

Robert Propst and Jack Kelley

Benefits

- Modular, moveable components enable real time, process-driven changes without the disruption of construction
- Durable and easy to clean, with excellent utility management
- Allows efficient and flexible organization, from interchangeable drawers to mobile storage

Warranty

12-year

Key Features

1. Vertical Space

Vertical use of space along the lab's perimeter can do double duty: It maximizes storage both above and below work surfaces while keeping sight lines clear.

2. Heavy-Duty Surface Option

A heavy-duty surface option supports up to 400 pounds on the surface, regardless of storage weight under the surface.

3. Tables

Height-adjustable, mobile tables are also part of the Co/Struc offering.

4. Storage

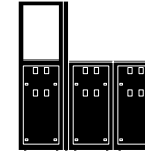

Storage can be transported with an L-Card (not shown). Easy-to-clean and durable, high-impact thermoplastic drawers can be removed for cleaning or restocking supplies.

5. Accessible Power and Data

Power and data are available every 12 inches along the chase rail.
