

# 13EIGHTY

---

Design by Scholten & Baijings

HAY's 13EIGHTY chair designed by Dutch designers Scholten & Baijings is aptly named after the number of tiny holes in the moulded polypropylene shell. These perforations create a characteristic aesthetic, where transparency and a play of light and shadows add to the chair's expression, while the variations in the sizes of the holes bring a sense of movement to the visual appearance. They also have a functional use in draining rainwater off when the chairs are used outdoors. Available in a stackable design that features steel legs with a weather-resistant coating to make it suitable for outdoor use.

## PRODUCT DETAILS

- / Moulded plastic shell with steel legs.
- / The base has a two-component primer coating and outdoor powder finish that provide a protective barrier against corrosive elements, making it ideal for both private and public environments.
- / Variability of shell colours and base finishes.
- / Suitable for a wide variety of private and public environments.
- / Qualified for contract use.
- / Stackable up to 10 pcs.

# HAY
