

# Limerick® Chairs

A stacking side chair that works well in a wide variety of settings, Limerick delivers extraordinary value. Ganging glides let you link the chairs easily to make neat rows of seating for classrooms or auditoriums. The back is curved and flexible, providing lumbar support. An opening between the back and seat allows for ventilation and makes the chair easy to carry. Limerick is available in four shell colors. With its slender profile and black frame, Limerick fits nicely in any office environment.

## Designer

Tom Newhouse

## Benefits

- Stack 36 high on a specially designed cart or 10 high on the floor
