

OE1 Powerbox and Power Tray

With the OE1 Powerbox and Power Tray, you can truly work from anywhere for extended periods because you carry the power source with you. Each battery powers multiple small electronic devices simultaneously and, when paired with the Power Tray, powers large devices, including monitors.

Benefits

- The Powerbox charges small devices anywhere you work. This mobile battery has three USB-C ports, one USB-A port, and a tracking device holder.
- Large devices in places that don't have easy access to routed power stay charged for long periods with the Powerbox and Power Tray. The combo is designed to fit on OE1 Storage Trolleys.
- Recyclable batteries don't include any heavy metals or toxic materials, making them less hazardous to the environment and easier to handle during the recycling process.

Warranty

5-year

Key Features

- 1. USB-C Ports (3)**
Includes three USB-C ports for charging large electronic devices such as laptops and small electronic devices such as smartphones and tablets.
- 2. USB-A Port (1)**
Includes one USB-A port for charging small electronic devices such as smartphones and tablets.
- 3. Handle**
Easily identifiable and ergonomically designed, this handle makes it simple to pick up the OE1 Powerbox.
- 4. Power Level Indicator**
The Powerbox has a simple interface with four lights that indicate the charge level.
- 5. Tracking Device Holder**
A tracking device holder attaches to the bottom of the OE1 Powerbox. This helps organizations keep track of the Powerbox while they're deployed.
- 6. Power Large Electronics**
When used together, the Power Tray with Powerbox batteries can power larger electronic devices including monitors and projectors.
