

# Overlay™

Designed to transform an open floorplan, Overlay is a system of sub-architectural, movable walls intended to help you define your space. Use Overlay to create freestanding rooms, give shape to large open spaces, or simply divide one area from another. Because Overlay is flexible, and can take mere hours to relocate, your office could function as one space today and by tomorrow, serve a totally different purpose all without calling the contractor. Designed by Birsel + Seck, Overlay creates visual clarity in open-plan offices, helping people understand where their best work will happen and giving organizations the agility to evolve on the fly.

## Designers

Ayse Birsel and Bibi Seck

## Benefits

- Freestanding, relocatable solution
- High-performance vertical surfaces
- Adds visual clarity to the open plan

## Warranty

12-year, 3-shift

Please visit [hermanmiller.com/warranty-terms](https://hermanmiller.com/warranty-terms) for details.

## Key Features

1. **Trellis**  
Add a Trellis to increase the level of acoustic privacy for people both inside and outside the space.
2. **Performance Wall**  
This workhorse wall supports the use of power in the space and can mount a monitor on either side of the wall, or both.
3. **Spanner Zone**  
Material options include tackable fabric, laminate, markerboard, glass, wood slats, perforated metal, curtains, or a custom solution.
4. **Sliding Glass Door**  
A sliding glass door creates an enclosed space that signals when meetings are in session and minimizes disruptions.
5. **Power Distribution**  
Route existing building electrical to this space through an Overlay floor or ceiling power entry.
6. **Linear Light**  
The dimmable and motion-sensing Linear Light illuminates the surface below.

## Statement of Line Overview

**Performance Wall Structure**

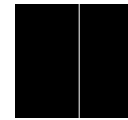

**Performance Wall Column**

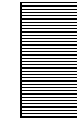

**Spanner**

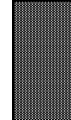

**Cladding**

**Wood Slat**

**Perforated Metal**

**Linear Light**
