In their expression of pure geometry, Polygon Wire Tables provide an elegant solution to the need for all manner of surfaces, at home, the office, and elsewhere. The structure of the table's wire base yields a dual advantage: a symmetry of form that uses minimal material for maximum strength and a logical method for scaling up or down in size and height to accommodate various dimensions of round, triangle, and hexagon tops of painted Formcoat. By unifying the color of base and top—in a choice of black, white, or graphite—a single table has a subtle appearance, and a gathering of tables creates an organic composition.
