

# TL Series Keyboard Support

Help your body, technology, and furniture stay in harmony with an adjustable keyboard support. This compact option can be mounted directly to the underside of a work surface in just 10 inches of space, making it ideal for surfaces with stiffeners or table troughs on the underside. A soft-touch knob lets you tilt the support to maximize your comfort in a variety of postures. Available with a wide range of keyboard trays and mousing surfaces, the support folds back beneath the work surface and out of your way when not in use. The TL Series meets or exceeds ANSI/BIFMA requirements.

## Benefits

- Mechanism requires just 10 inches of space to install, so it can be used in applications where stiffeners would typically prevent mounting
- Innovative, slim keyboard mechanism and platforms accommodate virtually any application

## Warranty

12-year, 3-shift
