

Twist™ LED Task Light

The energy-efficient, eco-friendly Twist LED Task Light leaves a tiny carbon footprint. First, manufacturing it requires little energy because it has few materials. Second, it consumes 40 to 50 percent less energy than traditional undershelf lighting. Finally, packaging is minimal, so more units can be sent at once, reducing the amount of energy—and money—needed to ship.

Designer

Yves Béhar

Benefits

- Uses about half of the energy of other undershelf lights while producing appropriate light in any workstation and on any task
- Supplies 60,000 hours—or 24 years—of light (at 10 hours per day for a five-day work week)
- Provides control over illumination for a specific task through a clear, tactile tab that changes the angle of light on the table or back surface, preventing glares

Warranty

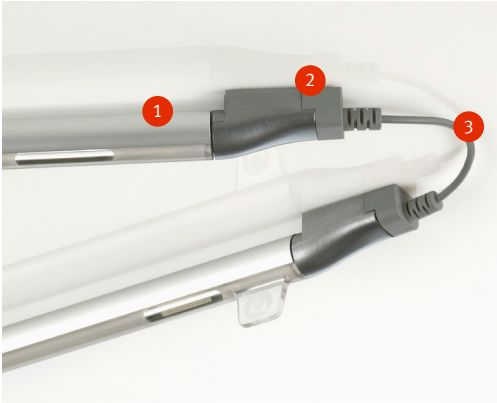

5-year
