

Wishbone® Monitor Arms

The refined design of the Wishbone family frees space on your work surface while allowing you to position your technology at the proper distance to ease neck strain. Wishbone's robust engineering, wide range of installation heights, and precise controls allow you to place one to four screens on a single pole.

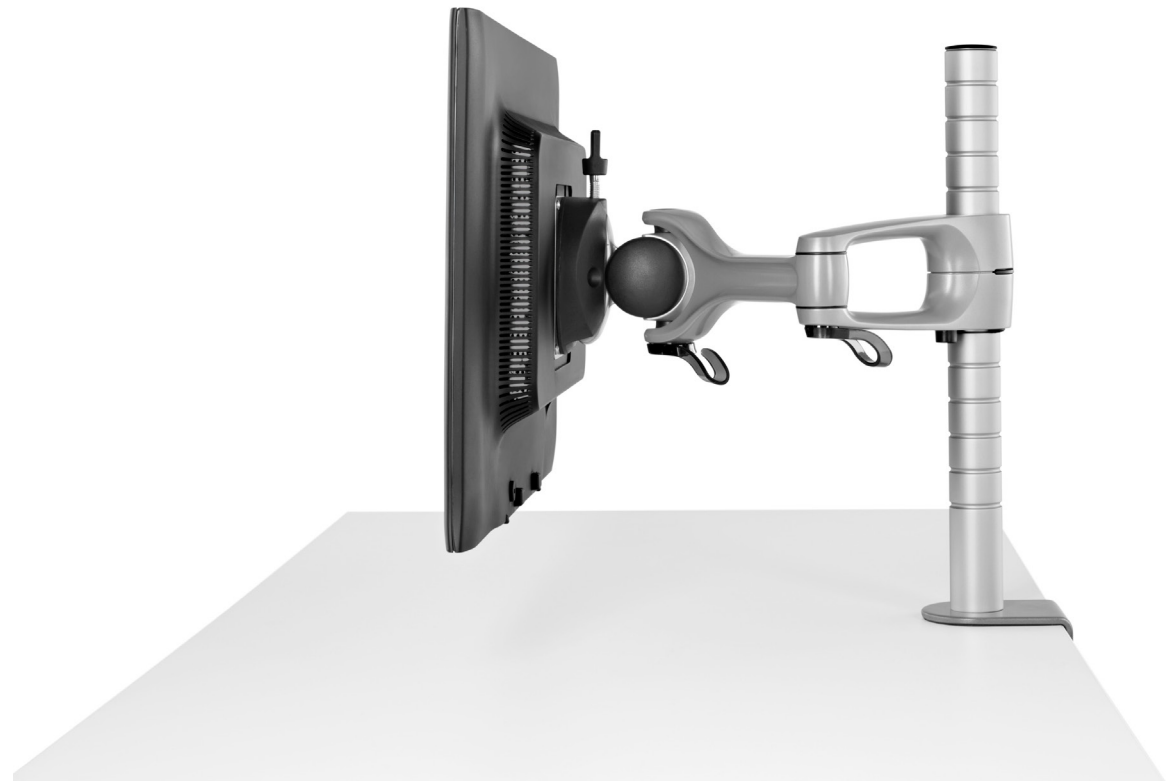

Benefits

- Heavy-duty arm accommodates up to four substantial screens
- Saves space on work surface with the use of a single post, without the need of additional brackets

Warranty

12-year, 3-shift

Wishbone® Monitor Arms

Key Features

- 1. Single-Post Design**
Up to four arms can be easily mounted on one post without additional brackets.
- 2. Supports Heavy Monitors**
Wishbone supports monitors weighing up to 26 pounds with standard Wishbone and up to 52 pounds with Wishbone Plus.
- 3. Portrait and Landscape Orientation**
All devices can rotate between portrait and landscape orientation, and a quick-release mechanism lets you remove them in seconds.
