

How to install the Herman Miller material library files:

1. First, download and save the material library files to your computer. You will need to extract the zip file.

*If you already have CAD Pack Furniture Manager for Revit installed, the libraries are saved here: C:\ProgramData\HMI\HMI Revit\Library*

2. In Revit, click the Manage Tab → Settings Panel →  Materials.
3. In the lower left corner of the Material Browser dialog, click the  drop-down menu → Open Existing Library.
4. Browse to one of the Herman Miller material library files (.adsklib), and click Open.

How to copy materials from the library into your project:

1. Click on a material category to expand its selection. Select the  Add Icon to add this material to your project.
