Ode™ Table Top Lamp

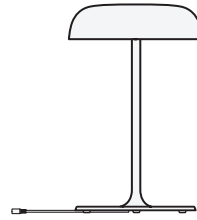

How to assemble your table lamp.

Step 1

Connect power supply cord to table lamp assembly.

Parts Included

A. Table Lamp

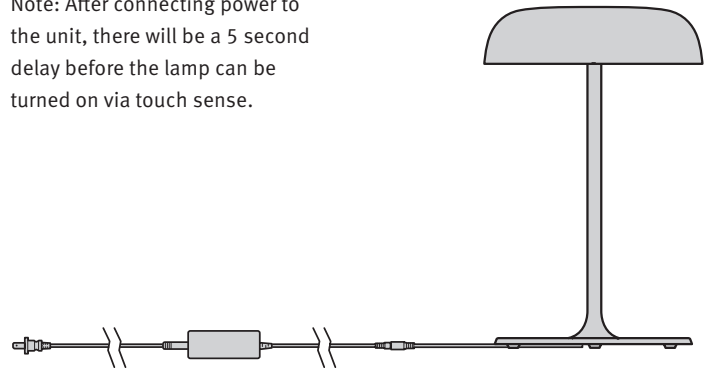

B. Power Supply

Step 2

Place lamp on desired work surface, making sure power supply and cord are properly routed. Plug power supply into a standard electrical outlet.

Note: After connecting power to the unit, there will be a 5 second delay before the lamp can be turned on via touch sense.

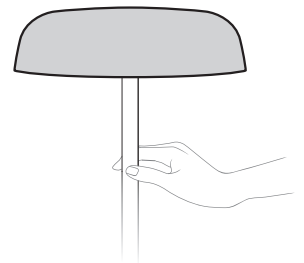

To operate lamps:

Grasp any part of the stem to turn lamps on or off. Table lamps also have a dimming function; after a table lamp has been turned on, grasp the stem again to dim, then once more to turn it off.

NOTE: By design light automatically shuts off after nine hours.

For Example: The light is turned on and runs for two hours before being turned off. The light is then turned on again so now it will continue to run for an additional seven hours and then will turn off automatically.

Note: If at anytime the lamp is moved or it seems to be functioning erratically, you will need to perform a reset on the lamp.

To Reset Lamp:

- 1. Disconnect power to the lamp for 10 seconds.**
- 2. Reconnect power, stand clear of lamp (not touching) for 10 seconds.**
- 3. After 10 seconds has lapsed touch post to turn lamp on.**

TROUBLESHOOTING	
 	Light Use. Before the Ode Light will operate properly it must be located in the intended location and then plugged in to the electrical supply for atleast 10 seconds to allow the touch sensor to adapt to the light's environment.
 	If the customer wants to move the Ode Light, they must unplug the Ode Light from the electrical supply, move to new location. Plug the Ode Light back in to the electrical supply and wait at least 10 seconds. The Ode Light Touch Sensor should operate properly after this time has elapsed.
 	If the Ode Light does not Operate properly, follow the unplug the Ode Light and wait at least 10 seconds instruction. Plug the Ode Light back in to the electrical supply and wait at least 10 seconds. The Ode Light Touch Sensor Should operate properly after this time has elapsed.
 	NOT following the recommended elapsed wait times may cause the Ode Light to Not Operate or Operate erratically.
