## Ode™ Table Top Lamp

### Parts Included

A. Table Lamp

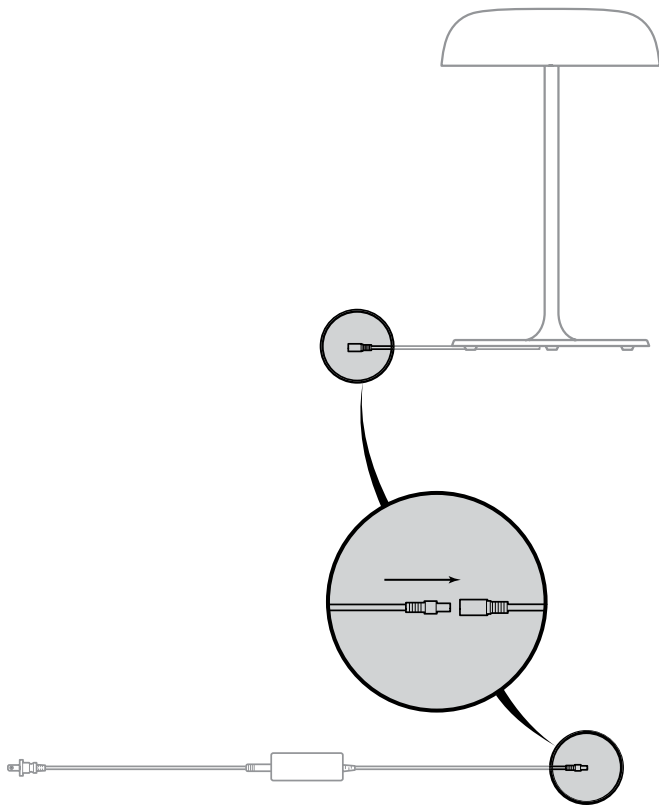

B. Power Supply

## How to assemble your table lamp.

### Step 1

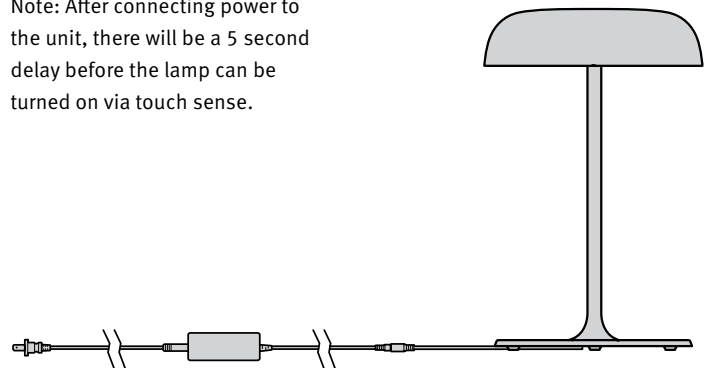

Connect power supply cord to table lamp assembly.

### Step 2

Place lamp on desired work surface, making sure power supply and cord are properly routed. Plug power supply into a standard electrical outlet.

Note: After connecting power to the unit, there will be a 5 second delay before the lamp can be turned on via touch sense.

### To operate lamps:

Grasp any part of the stem to turn lamps on or off. Table lamps also have a dimming function; after a table lamp has been turned on, grasp the stem again to dim, then once more to turn it off.

NOTE: By design light automatically shuts off after nine hours.

For Example: The light is turned on and runs for two hours before being turned off. The light is then turned on again so now it will continue to run for an additional seven hours and then will turn off automatically.
